ACKNOWLEDGEMENT

This account of my research work owes much to the ready help of my guide and a number of people whom I came into contact during my research process. It is a pleasant duty to write this acknowledgement and to mention particularly, Dr. Kewal Krishan, Reader, Department of Physical Education, M.D. University, Rohtak under whose sound guidance, supervision, kind attitude, sincere help and painstaking manner I worked and made the thesis more lucid.

I am deeply thankful to all the physical educationists, coaches and sports persons from which the data for the present work was collected, for their sincere cooperation with great zeal and zest. I am also grateful to Dronacharya Awardee M.K. Kaushik and his family for their sincere co-operation and assistance in this endeavour.

I also owe my debt of gratitude to Dr. (Mrs.) Santosh Sharma Professor and Head, Department of Physical Education, M.D. University, Rohtak and staff members of the Department for their moral support and valuable suggestions. Thanks are also due to Mr. Sumit Malik and Mr. Shamsher Nandal for their moral support and timely help whenever needed.

Last but not the least, I express my deep sense of regards and gratitude to parents who not only served as a source of motivation, cheered me up for advance studies and faced hardship with great patience for my inability to render my services at the time of their need. I also express my unexplainable feelings towards my better-half Ms. Rekha and my children for their forbearance and encouragement during the time this manuscript was being written.

(Ajay Kumar)
