ACKNOWLEDGEMENTS

I am highly indebted to my supervisor, Prof. Surender Singh Sangwan, whose immensely erudite scholarship and incisive comments helped me develop and shape this study in the present form. Dr Sangwan's keen interest in my work developed in me a sense of confidence.

I will always remain grateful to Dr S.P.S. Dahiya for his constant encouragement and support. I also owe a big thank to Dr (Mrs) Asha Kadyan for her inspiration and invaluable help. My special thanks are also due to Dr (Mrs) Ranjana Sangwan for her affection and love.

My deepest appreciation goes to my parents who have always influenced my life with their support which has always been of strengthening nature.

My gratitude is particularly reserved for Mrs Poonam Rana for sending the books and relevant material from United States. I will always cherish the support from uncle O.P. Hooda and Manisha.

I must also express my thanks to the Library Staff of A.S.R.C., Hyderabad for providing me with books and other material which I needed to complete my present work.
