ACKNOWLEDGEMENTS

I wish to record my sincere thanks to my research adviser, Dr. Mrs. Sulochana Nagarajan, Assistant Professor of Chemistry, Regional Engineering College, Tiruchirapalli-620 015 for her guidance, encouragement and co-operation in completing the research work.

I am grateful to Dr. D. Venkappayya, Professor and Head, Department of Chemistry, Regional Engineering College, Tiruchirapalli for all his encouragement and help during my period of research study in the department.

I am also thankful to The Principal, Regional Engineering College, Tiruchirapalli for his help and encouragement.

I wish to place on record my sincere thanks to The Director of Collegiate Education, Madras for permitting me to do Ph.D. on Part-Time basis.

I would be failing in my duty if I do not acknowledge with gratitude the help rendered at both the academic and administrative levels and the keen interest in the project evinced by Mr. M.S. Soundararajan, Dr. V.B.S. Rajan, Mr. K. Jayaraman and Mr. K. Kunasekaran - former
Principals and Mr. G. Krishnamoorthi - the present incumbent of Government Arts College, Karur.

I am indebted to Mr. T. Selvakumar, Head, Department of Chemistry, Government Arts College, Karur for his kind generosity and understanding and for his help in extending laboratory facilities to carry out some of the experiments. I am equally thankful to all other staff, both teaching and non-teaching of the college who had been helpful to me in the progress of the research work.

I wholeheartedly thank Dr. S. Nagarajan, Reader in Chemistry, Bharathidasan University, Tiruchirapalli for his constructive criticisms and counselling. I am extremely grateful to him for everything he has done to inspire me to make the Thesis a real contribution to the field of knowledge.

Mr. M. Rajendran, Research Scholar in The Rapinat Herbarium, Tiruchirapalli and Mr. J. Selvamani of the Department of Botany, Government Arts College, Karur deserve a special word of thanks for their help in identifying the plants taken up for investigation.

The services of the technical staff at the Sophisticated Instruments Facility, Indian Institute
of Science, Bangalore and the Regional Sophisticated Instrumentation Centre, Indian Institute of Technology, Madras in recording NMR and MS spectra are duly acknowledged.

My discussion with Dr. K. Balasubramanian and Dr. M. Michael Aruldhas of the Department of Endocrinology, Institute of Basic Medical Sciences, Madras had been very stimulating and helpful in designing the pharmacological assay of the isolates. I owe a debt of gratitude to all the staff and research scholars in the Department who had been helpful in carrying out the pharmacological studies. The services of the Fredrick Institute of Plant Protection and Toxicology, Madras which supplied the animals in time as per requirement are also acknowledged.

I must express my deep sense of appreciation to Dr. D. Sukumar, Dr. M.K. Valsakumari, Mr. B.Jaswant and other staff and research scholars of the Department of Chemistry, Regional Engineering College, Tiruchirapalli for all their spontaneous help.

I thank Mr. G. Chokkalingam, for the neat and efficient typing of the Thesis.

It is my bounden rather than perfunctory duty to appreciate the great sense of understanding and
spirit of forbearance that my kith and kin have remarkably exercised during many a crucial stage of this work.

As a wayward boat adrift on seas is saved by the kindly light of the lighthouse, I have been promptly and perfectly embraced in my quest for materials and points relevant for my Thesis by my brethren well-known and partly-known. I humbly submit my tears of gratitude at their door-steps.

Above all, I thank the Almighty for all inscrutable means by which He has fructified my efforts.

(V. RAGUNATHAN)
