ACKNOWLEDGEMENTS

The works presented in the thesis were carried out in the Department of Botany, Gauhati University during the years, 2006-2008.

I remain grateful to Late Professor K.N. Bora, Department of Botany, Gauhati University under whose guidance I had initiated this work and carried out most of the experimental for the study.

It has been my proud privilege to complete this research work under the able guidance of Dr. S.K. Borthakur, Professor, Department of Botany, Gauhati University, who had shoulder the responsibility of guiding me for the remaining works after the sad demise of Professor K.N. Bora. For this act of kindness I owe my deep sense of gratitude and sincere regards for his expert guidance and constant inspiration during the course of this investigation and preparation of this thesis.

I express my sincere gratitude to Dr. D.K. Jha, Professor and Head, Department of Botany, Gauhati University for kindly extending me his helping hand from time to time and laboratory facilities for the investigation.

I keep on record my sincere thanks and gratitude to Prof. S.P. Borah and other Faculty members of Botany Department, Gauhati University for their valuable suggestions and helpful co-operations during the period of this investigation.

This work would never have been accomplished without the back-up and inspiration of my father Saiful Islam and mother Saleha Sultana. During this period my wife Afrruja and son Aabyaz always stood by me all along to bear everything with their co-operation and enduring patience. I owe them an unpayable depth of gratitude.
