Appendix 6

SOME MOMENTS DURING THE STUDY

Anopheles mosquito feeding on cattle

Vector collection hut

Children are at more risk of malaria
Anopheles vector breeding habitat in thick forest

Installing of CDC trap

Vector breeding location near Indo-Bangladesh border

Anopheles vector breeding habitat in thick forest
Malaria diagnosis using rapid diagnostic kit

Centrifuging for DNA extraction

Microscopic identification of malaria parasite
Bio-safety cabinet used for PCR loading

Thermal cycler used for DNA amplification

Gel-Documentation system used for DNA resolution
