CHAPTER I: INTRODUCTION

1.1. Introduction 1

1.2. Objectives 5

1.3. Review of literatures 5

1.3.1. Inventory and taxonomy 5

1.3.1a. History of lizard study in India 5

1.3.1b. History of lizard study in northeast India 9

1.3.2. Microhabitat and community structure 11

CHAPTER II: STUDY AREA AND METHODS

2.1. Study area 13-17

2.1.1. Location 13

2.1.2. Brief description and history 13
2.1.3. Topography and soil type

2.1.4. Forest vegetation

2.1.5. Climate

2.2. Methods of study

2.2.1. Study period

2.2.2. Preliminary field work: site selection and habituation

2.2.3. Study design and data collection

2.2.4. Taxonomy of skink species

2.2.5. Survey and data collection

(i) Active search and opportunistic methods

(ii) Visual encounter surveys (VES)

(iii) Roadkills and Basking surveys

(iv) Microhabitat study

(v) Rainfall and temperature

(vi) Morphometric measurements

(vii) Scalation

(viii) Photographic documentation

(ix) Identification and nomenclature

2.2.6. Data analysis

2.2.6.1. Diversity and evenness
(i) Simpson’s diversity index (D) 23
(ii) Shannon index 23
(iii) Shannon’s equitability ($E_n$) 24
2.2.6.2. Niche breadth and niche overlap 24
(i) Levin’s measure 25
(ii) Pianka’s index 25
2.2.6.3. Microhabitat data analysis 26
2.2.6.4. Morphological analysis 26

CHAPTER III: RESULTS

3.1. Inventory and natural history 27-45

3.1.1. Lizard diversity 27
3.1.2. Systematic account of species 27
3.1.2.1. Family: Agamidae 27
3.1.2.2. Family: Gekkonidae 31
3.1.2.3. Family: Lacertidae 37
3.1.2.4. Family: Scincidae 38
3.1.2.5. Family: Varanidae 41
3.1.3. Range extension 45
3.1.4. Rediscovery 45
3.1.5. Abundance of lizards 45

3.2 Microhabitat and community structure of skink 46-59

3.2.1 Microhabitat study 46
3.2.2 Species richness, evenness and diversity 54
3.2.3 Niche breadth and niche overlap 54
3.2.4 Relationship between temperature, rainfall and abundance 55

3.3 Taxonomy of skink 59-71

3.3.1. *Eutropis macularia* 59
   a. Synonym of the species 59
   b. Mensural and meristic characters 60
   c. Colouration 60

3.3.2. *Eutropis multifasciata* 61
   a. Synonym of the species 61
   b. Mensural and meristic characters 61
   c. Colouration 62

3.3.3. Key to the species: *Eutropis* 62

3.4.4. *Lygosoma albopunctata* 62
a. Synonym of the species 62
b. Mensural and meristic characters 63
c. Colouration 63

3.3.5. Key to the species: *Lygosoma* 63

3.3.6. *Sphenomorphus indicus* 64
a. Synonym of the species 64
b. Mensural and meristic characters 64
c. Colouration 65

3.4.7. *Sphenomorphus maculatus* 65
a. Synonym of the species 65
b. Mensural and meristic characters 65
c. Colouration 66

3.3.8. Key to the species: *Sphenomorphus* 66

3.4.9. Hierarchical Cluster Analysis 69

**CHAPTER IV: DISCUSSION**

4.1. Inventory and natural history 72

4.2. Microhabitat and community structure 74

4.3. Taxonomy of skink 75
4.4. Conclusion
