# Table of Contents

## SYNOPSIS

I-XV

## Chapter 1: Introduction

1.1 General introduction 1
1.2 A brief coverage on palladium and platinum complexes 5
1.3 Organochalcogen ligands 9
1.4 Applications of platinum group metal chalcogen complexes 16
1.5 Scope of work 26

## Chapter 2: Experimental

2.1 Materials and methods

2.1.1 Glasswares 27
2.1.2 Experimental and analytical techniques 27
2.1.3 Materials 40

2.2 Synthesis of pyridyl and 3-methyl-2-pyridyltellurolate complexes of platinum(II) 52

2.3 Synthesis of pyridyl- and 3-methyl-2-pyridylthiolate, selenolate and tellurolate palladium(II) phosphine complexes 60

2.4 Synthesis of pyrimidylselenolate and tellurolate complexes of platinum(II) and palladium(II) 69

2.5 Synthesis of nicotinamide based organoselenolate complexes of platinum and palladium 76

2.6 Synthesis of arylchalcogenolate complexes of platinum(II) and palladium(II) 81
Chapter 3: Results and Discussion

3.1 Chemistry of pyridyl and 3-methyl-2-pyridyltellurolate complexes of platinum  87

3.2 Chemistry of pyridyl and 3-methyl-2-pyridylthiolate, selenolate and tellurolate complexes of palladium  109

3.3 Chemistry of pyrimidylselenolate and tellurolate complexes of palladium and platinum  124

3.4 Chemistry of nicotinamide based organoselenolate complexes of palladium and platinum  136

3.5 Chemistry of arylchalcogenolate complexes of palladium and platinum  150

Chapter 4: Summary and Conclusions  164
