## LIST OF TABLES

2.1 Typical sensors and their outputs ......................................................... 27
2.2 RS-232 Voltage Levels ........................................................................ 45
2.3 Comparison of the logic levels of CMOS and TTL .............................. 47
3.1 Pinouts for parallel port connectors ................................................... 57
3.2 Bit to Pin Mapping for the Standard Parallel Port (SPP) ..................... 57
4.1 Commonly used RS-232 signals and pin assignments ........................ 99
