Baba and Ma
Declaration

This thesis is a presentation of my original research work. Wherever contributions of others are involved, every effort is made to indicate this clearly, with due reference to the literature, and acknowledgement of collaborative research and discussions.

Acknowledgement

The research presented in this thesis has been primarily carried out at Materials Science Division of Bhabha Atomic Research Center. I am very grateful to all the members of this division who have been directly or indirectly related to this work for their help and support throughout these years.

Firstly, I would like to express my deep and sincere gratitude to my supervisor, Dr. Vivekanand Kain, for being a great teacher and source of inspiration to me. It was because of his constant guidance, encouragement, patience and all round support that led to the successful completion of this work within the targeted time.

I would like to thank Dr. G. K. Dey for his encouraging words and cooperation at each stage of research. I would like to thank all the members of the monitoring committee for their valuable suggestions and support throughout the duration of work. I would like to thank Prof. I. Samajdar and his team at the Texture laboratory of IIT Mumbai, with a special mention to Late Shweta Mulki and Shri Ajay Kumar for extending their facilities and for all the help received from them during experimentation.

I would like to take this opportunity to thank my friend Dr. M. Kiran Kumar and Dr. Timo Saario for the endless help rendered by them and for the guidance received from them during the past years. They kept teaching me the simplest and the greatest lessons of life which I would cherish for years to come. I thank Prof. K. K. Ray who has imbibed in me the culture of research and the training received from him has laid the foundation of my research career.

Working has always been great fun, thanks to the vibrant team of Corrosion science section which made complicated problems look simple. I would like to specially thank Shri Thomas Abraham, Shri Mahendra Singh Patil and Shri Vivek Choudhury for helping me in carrying out some of the experiments.

Finally, big thanks to my family for always being there for me. I have always aspired to be like my father, Late Bhaskar Ghosh, and he would have been the happiest person to see my thesis in its final shape. My mother, Smt Mira Ghosh who is my strength and it is her encouraging words at times of distress that drives me. Thanks to my sisters, who bring joy to my life. Without their constant support I would have not been able to concentrate and complete my work. My husband, Dr. Amit Acharyya who has always believed in me and encouraged me to aim higher. His dedication and enthusiasm in pursuit of science constantly motivates me.

Swati Ghosh
