ACKNOWLEDGEMENT

First and foremost, I would like to thank my research supervisor Dr. Anurup Gohain Barua whose support and guidance made my thesis work possible. He has been taking active interest in my work and has also been giving right advice to me from the start of my Ph.D work. I am very grateful for his patience, motivation, enthusiasm and immense knowledge in the field of atomic and molecular Physics that, taken together, make him a good mentor. My words will never be adequate to express my gratitude towards him.

I would like to thank my mother Mrs Mrinalini Goswami Pathak and brother Latu for inspiring and motivating me towards research. They took so much pain and helped me in every possible way to complete my thesis in time.

I would like to thank Prof. Kalynee Baruah, former HOD, Physics Department, GU and Prof. N. Nimai Singh, present HOD, Physics Department, GU for agreeing to approve this work and giving facility to work in the department. I have gained quite a lot from my interactions with all the faculty members at GU. I would also like to thank Emeritus Prof G D Barua for his valuable suggestions in my research work.

I would like to offer my sincere thanks to Dr D. Gupta (National Physical Laboratory, New Delhi), Dr. P. K. Boruah and Dr. S. Bordoloi (Departments of Chemistry and Instrumentation, respectively, of Gauhati University) for their contribution in the recording of FT-Raman, FT-IR and XRF spectra, respectively. I thank Dr B. Jain and Dr P. K. Gupta, Laser Biomedical Applications and Instruments Division, Raja Ramanna Centre for Advanced Technology, Indore, India for their help.
in performing the fluorescence experiments. I would also like to thank SAIF, NEHU, for their contribution in recording Atomic Absorption Spectra of my samples.

I would also like to thank Mrs Gayatri Goswami, Assistant Professor, Department of English, Joysagar College for giving many valuable suggestions regarding the language structure of the thesis. I would specially like to acknowledge Arvind Kumar Saxena for his help in terms of study materials and also for his moral support.

I would like to thank my seniors and friends, namely, Jolly, Simanta, Samiran, Hari Om, Sanjeev, Priyalaksmi ba, Zeen ba, Rupjyoti ba, Bhaskar da, Manasiba, Sulochana di, Nabaratna, Subhankar, Nilakshi, Anayara, Akbari, Rupalim, Bornali and all the boarders of Gandhi Bhawan Research Scholars' hostel for their undying support and stimulating discussions.

I would like to acknowledge UGC for offering me the financial assistance during my research work through RFSMS fellowship scheme and partially through the Major Research Project No. F.31-15/2005 (SR).
