3.3 Molecular characterization and detection of potent phytopathogenic pathogen *Fusarium oxysporum* 59–62

3.3.1 Isolation of DNA 59
3.3.2 RAPD Fingerprinting 60
3.3.3 RAPD data Analysis 60-61
3.3.4 Development of SCAR marker 61
3.3.5 Amplification of ITS region of ribosomal DNA 62

3.4 Control of phytopathogens using herbal and medicinal plant extracts 63–75

3.4.1 Collection and identification of plants 63
3.4.2 Determination of moisture content 63
3.4.3 Cold extraction 63
3.4.4 Determination of yield of plant extracts 63–64
3.4.5 Preparation of extracts for experiment 64
3.4.6 Culture Media preparation 64
3.4.7 Test inoculum preparation 64–65
3.4.8.1 Agar well diffusion method 65
3.4.8.2 Minimum Inhibitory Concentration (MIC) and Minimum Fungicidal Concentration (MFC) 67
3.4.8.3 Thermal stability and longevity of plant extracts 67–68
3.4.9 Phytochemical screening of chloroform extract of *P. betle L.* 68–70
3.4.10 In vivo control of *Fusarium* wilt of tomato 70
3.4.10.1 Inoculum preparation 70
3.4.10.2 Plant material 71
3.4.10.3 Soil infestation and treatment 71
3.4.10.4 Control of Fusarium wilt 71–72
3.4.10.5 Population assessment of *Fusarium* in treated soil 72
3.4.10.6 Variation in growth patterns and disease development 73
3.4.10.7 Determination of accumulation phenolics in root tissue 73–74
3.4.10.8  Electron microscopy analysis of tomato root tissue 74
3.4.10.8.1 Scanning electron microscopy analysis of tomato root tissue 74
3.4.10.8.2 Transmission electron microscopy analysis of tomato root tissue 74-75

CHAPTER 4  RESULTS 76-138
CHAPTER 5  DISCUSSION 139-144
CHAPTER 6  SUMMARY AND CONCLUSION 145-148

BIBLIOGRAPHY 149-178
