ACKNOWLEDGEMENTS

This thesis would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

At this moment of accomplishment, first of all I am indebted to my guide Dr. Kishor H. Chikhalia. Under his guidance I successfully overcame many difficulties and learned a lot. His unflinching courage and conviction will always inspire me, and I hope to continue to work with his noble thoughts. During the composition of this work, the most important lesson I have learned from him was to continually narrow the focus of the research until it reached the point of an achievable goal.

I am deeply thankful to former Heads of Chemistry Department, Gujarat University, Dr. S. K. Menon and Dr. N. K. Shah for their help, advice and encouragement.

I am very much privileged to learn from my friend Poojan Patel, who consistently extended his research expertise throughout my work and I owe a lot to him for this achievement. Collective and individual acknowledgments are also owed to my colleagues whose presence somehow perpetually refreshed, helpful, and memorable. Many thanks go in particular to my seniors Rahul Modh and Dhara Desai. I am also thankful to Himanshu, Sulochna, Umar, Mazhar, Amit, Nirali, Harshad, Dhruvin and Saumil for standing always beside me during the happy and hard moments to push me and motivate me. I can see the good shape of my thesis because of their help and suggestions in formatting the entire thesis. I am grateful to all the teaching and non-teaching staff of Chemistry Department, Gujarat University for providing a stimulating and pleasant atmosphere for me here.

During my research work there was continues support from my family. It was their kindness and patience that they allowed my absence from my family duties. I have no words to express my gratitude for the unconditional love, support, inspiration and blessings given by my father Prafulbhai and my mother Late Smt. Bhanumatiben. I feel much obliged to my parent for all the troubles they have taken to give me the best possible education to realize my dream. Thank you Mummy you dreamed what I am today. I wish to my special thank sister Pratimaben and Jiju Upendra kumar to steer my progressive way for my life. It’s my fortune
to gratefully acknowledge my sisters Inaxiben, Mehalben and Sonalben for their encouragement and unfailing love. I wish to appreciate my Jiju Miteshkumar, Kalpeshkumar and Jayeshkumar for their helping hands and inspirations. A special acknowledgement goes to my lovely nephews Priyam, Mauriya, Pratham, Shakan, Parakh and nieces Jinal and Heli who forgive me for sharing only little time for their care.

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of love from my fiancé Dixita who was always there when I really needed. Thank you doesn’t seem sufficient but it is said with appreciation and respect for her support, encouragement, care, understanding and precious friendship. My sincere gratitude goes out to my father in law Harishbhai and mother in law Vinodaben for their support and generous care. I wish to appreciate my brother in laws Vipul and Mohit for their helping hands and inspirations.

Jignesh P. Dalvadi
