ACKNOWLEDGEMENT

Research has always been an ongoing process—a journey and not a destination. So has been mine-full of astonishments and amusements. No research is ever the outcome of single individual’s talent or efforts. This work is no exception. It provides me pleasure to convey my gratitude to all those who have directly or indirectly contributed to make this work a success. As one flower makes no garland, the present work would not have taken shape without wholehearted encouragement, goodwill and co-operation of a number of people and institutions. At this juncture, I seize this opportunity to express my deep gratitude to all of them.

A teacher is a guide, philosopher and friend, whom I could find in my guide Dr. Nisha K. Shah, Professor & Head, Department of Chemistry, with deep sense of gratitude. My thanks go to her, whose boundless enthusiasm and valuable suggestions made this work possible. It is with affection and reverence that I dedicate often beyond the call of the duty. It was a great pleasure working under her guidance. Besides being a guide for my work, Nisha mam is a mother figure and path leader. I am immensely grateful for her wise counsel and support which is incredible. Her brilliant creativity and enthusiasm has guided my research work from its conception to completion.

I, at this moment of time, cannot express in words the invaluable guidance and thorough wisdom bestowed by my mentor Dr. Pathik S Brahmkshatriya, Team Leader, Oxygen Healthcare Pvt. Ltd, Ahmedabad, whose deep sharing and synergy have moved me many levels beyond my own thinking. Apart from his technical and scientific guidance, systematic style of working, unbiased nature and perpetual encouragement, has kindled in me the desire to learn the art of synthetic work to the minute detail. He is the one who has ignited my interest in Computational Chemistry and provided me the necessary resources to explore my ideas. I am greatly indebted to
him for his moral support and constant creative motivation throughout the course of my work. It is a great pleasure to acknowledge the generosity for the kind venture he had pursued during my study. I am fortunate to share an eternal bond with such a noble soul.

It gives me profound pleasure to express my deep gratitude towards Dr. Mahesh T Chhabria, Assistant Professor, Department of Pharmaceutical Chemistry, L.M. College of Pharmacy, Ahmedabad. I would like to thank him for his priceless guidance, overwhelming enthusiasm, untiring cooperativeness, constant encouragement, critical remarks, precise discussions, timely suggestions and the nourishment of knowledge conferred upon me. I would like to thank him for sparing his valuable time for me. He has constantly motivated me to step towards success, without being dissipated by frolics and failures. He trained me to be self-reliant to face the hard realities of life and in traveling any unknown path that I may encounter in future. The platform which he has given me would be an eternal benchmark for my carrier for which I am extremely indebted to him.

My sincere thanks to my esteemed teachers Dr. S.K. Menon, Dr. K.H. Chikhalia, Dr. V.K. Jain, Dr. C.V. Vyas, Dr. Pranav Shrivastava, Dr. M.M. Maisuriya, Dr. H.D. Patel and Dr. Harjinder Kaur for extending their wholehearted support throughout my work.

I greatly acknowledge financial support from University Grant Commission-Basic Scientific Research (UGC-BSR), New Delhi in form of Junior Research Fellowship.

I am thankful to all the non-teaching staff members of my beloved institute for helping me throughout the course of my study.

I wish to thank all my friends, colleagues, juniors and seniors who helped me directly or indirectly during the course of my study. To mention a few, I am thankful to Vipul
Buha, Vidhi Panchal, Aesha Patel, Unnati Naik, Divya ladha, Suresh Thakur, Poonam Wadhavani, Mookesh Madhup, Prapti Shah, Nirav Raval, Divya Buha, Krishna Atalia and Neha Parekh with whom I thoroughly enjoyed my stay at the laboratory. It was indeed a pleasure to learn from them many technical and non-technical ground realities.

Last but certainly not the least, I am indebted to God to give me such a caring and loving family whom I can always rely upon. They are the real backbones behind my success story. I greatly acknowledge the support from my parents, my dear brother and my wife Mital. She is the one who is the real witness of all the vicissitudes of my life. She withstood most of my anger and fluctuating behavior when things didn’t go write in or out of my laboratory. Apart from being the closest friend of mine since last 2 years, she would tolerate me for the rest of my life too, and I am extremely thankful to God for that! The work would never have been the same without the generous and affectionate support from my dear friend Mital.

Educational institutions have always been the pillar of an individual’s personality, they always bring the real gem out of an individual, and luckily, I am not an exception of this process. Last but not the least, I pay my reverence to this institute, Department of Chemistry, School of Sciences, Gujarat University, Ahmedabad. I am undeniably proud to be associated with this college and express my deepest indebted thanks to my esteemed, renowned and prestigious institution for transforming me from nothing to something.

October 2013
