ACKNOWLEDGMENT

This research study is an attempt to describe the Society and Economy of South Kamrup Tribal Belt from the declaration of the area as tribal belt in 1950 till 2001 census. As per the government norms an area is declared as a tribal belt if more than fifty percent of the population are tribal. The lives of the tribes in the referred belt has undergone a lot of changes under the impact of neighbouring non-tribal influence which was more prominent in the post independence period. The urge to carry this research work is prompted by the fact that hitherto no attempt has been made to study the society and economy of the South Kamrup Tribal Belt.
