Acknowledgement

To God be the glory and honour for having given me a sound mind and good health to complete my Ph. D. Thesis in spite of many challenging difficulties during the course of my research work. My sincerest gratitude is given to Him for facilitating to complete my research.

I wish to express my sincere gratitude to Dr. S.K. Borthakur, Professor, Department of Botany, Gauhati University, Guwahati without whose guidance, supervision and encouragement it would not have been possible for me to complete this work. My humble words are insufficient to carry the weight of my profound indebtedness and obedience to my guide who had spared his time and energy in completing the Thesis. His experience and knowledge about the region and the people of the study area has been a benchmark or reference for my research. I am thankful to him for his guidance and invaluable advice during field studies in different parts of Karbi Anglong district.

I am grateful to the Head, Department of Botany, Gauhati University for providing the basic facility for the present research.

Dr. M. Sanjappa, former Director, Botanical Survey of India (BSI), his constant encouragement has been as source of inspiration in completing the present Thesis. I convey my heartfelt gratitude to him. My sincere thanks go to Dr. PL Narashimhan, Scientist, Central National Herbarium (CNH), Howrah for providing important study materials relating to Karbi Anglong in particular and the north east India in general. Dr. A.K. Baishya, Jt. Director, CNH, Howrah also suggested valuable advice relating to research in ethnobotany and for this I am grateful to him. I also thank Mr. Sabapati, CNH who have identified some orchid specimens during my visit to CNH.

I am also thankful to the Pro-Vice Chancellor, Assam University-Diphu Campus for providing the basic facility for the present research and my departmental colleagues for their support and valuable suggestions.

The present would not have completed without the support and assistance of local guides and informants which also included pinpos (members of traditional institutions). Their hospitality during field study has given me the opportunity to observe plant use in
day-to-day life. A few such persons include Karki Parpet (Nongjerong), Khrin Kharwang (Murab), Pil Lakhaden (Ampu), Longsing Timung (Rongpangbong), Sri Enghi (Umbaso), Longki Teron, Phura Borgaonbura, D. Hanse (Hamren), Pinpo, Olong Malang, Bikrom Lekthe (Umpanai), Headman, Wailet (Mynser), Dok Phancho, Lindok Rongpi (Kro Kengdang), Late Homi Milick (Umkhymmi), Jugal Timung (Zirikindeng), Mondol Ronghang, Senar Habe, Hemari Rongphar, Sri Hanse, Samsing Terang (Baithalangso), Kajir Rongpipi, Hameswari Teronpi (Ampukhuri), Dilip S. Enhgi, James, Raan, Babu Bey, Romen, Tengkheng, Babu Teron, Debeswar, Jona (Diphu), Ronjit Teron (Dolamara) and Ronjit Ronghang (Chokihola), and others who are directly or indirectly associated with the present work.

I am thankful to the Karbi Anglong Autonomous Council (KAAC) for facilitating book grant and also for providing access to their library.

I am indebted to my Parents and wife who has supported me as I often have to stay outside to undertake field study.

Lastly, I wish to express my deep sense of gratitude to all who have directly or indirectly contributed in helping the present Thesis take its final shape.
