Acknowledgement

"Success or Failure is own decision."

I would like to express the deepest appreciation to my respected teacher, my present research guide Prof. Ngangkham Nimai Singh of Dept of Physics of G. U., who has continually and convincingly conveyed a spirit of adventure in regard to research and an excitement in regard to teaching. I really consider it an honour to work with Prof. Singh Sir, who always appreciates his students for their strength keeping aside their faults. Without his sincere guidance, encouragement and persistent help, I could not be able to complete the half-done work started under the supervision of (Late) Prof. S. A. S. Ahmed, within the stipulated time.

I take this opportunity to express my gratefulness to my respected teachers Prof. (Rtd.) H. L. Duorah Sir, Prof. (Rtd.) H. L. Das Sir, Prof. (Rtd.) D. K. Choudhury Sir, Prof. (Rtd.) B. K. Sarma Sir, Prof. (Mrs.) K. Duorah Madam, Prof. (Mrs.) K. Baruah Madam and Prof. M. P. Bora Sir and all other faculty members of the Department of Physics, G. U.

I would again like to extend my sincere thanks to all the faculty members of my own department, especially to Mr. Upakul Mahanta for his generous help in computer works.

I would like to thank Mr. Nabaratna Bhagawati, Research Scholar, Dept. of Physics, G. U. who provided me several important research papers related to my work.

In addition, a thank you to my friend Mr. Indrajyoti Roychoudhury, Asstt. Prof., Dept. of English, M. C. College, Barpeta, who gave me necessary suggestions in improving the stylistic presentation of the manuscripts.

Lastly, I extend my heartfelt thanks to my family and well-wishers.

Few words for the kind readers from
“The Principles of Quantum Mechanics”

Mathematics is the tool specially suited for dealing with abstract concepts of any kind and there is no limit to its power in this field. For this reason a book on the new physics, if not purely descriptive of experimental work, must be essentially mathematical.

— P. A. M. Dirac
