CONTENTS

Antioxidant Activity of Medicinal Plants Used Against Jaundice

Abstract / i-xii

CHAPTER 1

Introduction / 1-36

1.1 Jaundice: causes and classification / 3
1.2 Jaundice and antioxidants / 8
1.3 Home remedies for jaundice / 10
1.4 Commercial drugs used against jaundice / 14
   1.4.1 Allopathic drugs used against jaundice / 14
   1.4.2 Herbal drugs used against jaundice / 16
1.5 Phytochemicals present in drugs used against jaundice / 18
1.6 Phytochemicals as antioxidants / 19
1.7 Reported phytochemicals present in some plants used
   against jaundice / 21
1.8 Objective of the present study / 27
References / 28

CHAPTER 2

Field study on herbal drugs used against jaundice / 37-53

2.1 Introduction / 37
CHAPTER 3

Antioxidant activity of medicinal plants used against jaundice / 54-111

3.1 Introduction /54
3.2 Measurement of antioxidant activity /55
3.3 Materials and methods /57
  3.3.1 Experimental design /63
  3.3.2 Experimental procedures for measuring antioxidant activity /63
    3.3.2.1 Antioxidant activity of Glycosmis pentaphylla /64
    3.3.2.2 Antioxidant activity of Oroxylum indicum /68
    3.3.2.3 Antioxidant activity of Leucus plukentii /72
    3.3.2.4 Antioxidant activity of Cajanus cajan /76
    3.3.2.5 Antioxidant activity of Moringa oleifera /80
    3.3.2.6 Antioxidant activity of Centella asiatica /84
    3.3.2.7 Antioxidant activity of Averrhoa carambola /88
    3.3.2.8 Antioxidant activity of Ananus comosus /92
    3.3.2.9 Antioxidant activity of Scoparia dulcicis /96
3.4 Phytochemical screening in the plant extracts /100
3.5 Discussion on results /103
3.6 Conclusion /106
References /107
CHAPTER 4

Phytochemicals in *Glycosmis pentaphylla* / 112 – 163

4.1 Introduction / 112
4.2 Phytochemicals in *Glycosmis pentaphylla* / 115
4.3 Isolation and characterization of phytochemicals with high antioxidant activity / 118
   4.3.1 Materials and methods / 118
   4.3.2 Procedure for extraction / 118
   4.3.3 Fractionation of extracts and measurement of antioxidant activity of sub-fractions / 121
      4.3.3.1 Fractionation of extract A and measurement of antioxidant activity of different sub-fractions / 122
      4.3.3.2 Fractionation of extract B and measurement of antioxidant activity of different sub-fractions / 129
      4.3.3.3 Fractionation of extract C and measurement of antioxidant activity of different sub-fractions / 131
      4.3.3.4 Fractionation of extract D and measurement of antioxidant activity of different sub-fractions / 138
      4.3.3.5 Fractionation of extract E and measurement of antioxidant activity of different sub-fractions / 142
4.4 Spectral data / 146
4.5 Results and discussion / 147
4.6 Conclusion / 157
