ACKNOWLEDGEMENTS

I owe a particular debt of gratitude to Professor A. Krishnamoorthy for his patient supervision and steadfast encouragement throughout the development and writing of this thesis. His abundant advice and invaluable criticism were instrumental in the generation of new ideas.

I am also indebted to Professor T. Thrivikraman who has been helpful through his encouragement and personal interest.

It is a pleasure to acknowledge my debt to Dr. Vivek S. Borkar, TIFR, Bangalore for his help and keen interest shown in my research work.

I am thankful also to the teachers and research scholars of Department of Mathematics and Statistics, Cochin University of Science and Technology, with whom I have had useful discussions directly or indirectly bearing on this work. The help and co-operation extended by the office staff of the Department and my friends are gratefully acknowledged.

A special note of gratitude goes to Mr. Joseph who typed the entire thesis. His patience, excellent typing are thankfully acknowledged.

The financial support received from the National Board for Higher Mathematics (NBHM) is gratefully acknowledged.

Needless to say, the blessings and encouragement from my parents, brother and sisters were with me throughout.

M. MANOHARAN
