LIST OF TABLES

Tables | Pages
---|---
2.1 Status of women in terms of village grouping of the identified C.D. blocks | 31-31
2.2 Status of women in terms of socio-economic indicators in identified C.D. blocks | 32-32
2.3 Selection of Samples from Gaon Panchayats in the study area | 35-35
3.1 Maximum and minimum temperature, relative humidity, rainfall and number of rainy days of Guwahati Station, 1995 | 49-49
3.2 Communication facility in the villages of the identified C.D. blocks | 54-54
3.3 Educational Institute in the identified C.D. blocks | 56-56
3.4 Medical and drinking water facilities in the villages of the identified C.D. blocks | 57-57
3.5 Population growth, density of population and decadal variation of population in the identified C. D. blocks. | 58-58
3.6 Demographic profile of the of the identified C. D. blocks, 2001 | 59-59
3.7 Demographic profile of the of the Sample villages in the identified C. D. blocks, 2001 | 62-62
3.8 Main workers, marginal workers and non-workers in the identified C. D. blocks, 2001. | 63-63
3.9 Villages under different category of population density, 2001 | 72-72
4.1 Literacy rate in the identified C. D. blocks, Kamrup district, Assam (1991 & 2001) 110-110
4.2 Women literacy rate, gender gap in literacy among the villages of the identified C.D. blocks 113-113
4.3 Status of women in terms of literacy rate, gender gap in literacy and women work participation rate of the identified C.D. blocks 114-114
4.4 Literacy rate, gender gap in literacy and work participation rate of the sample villages 115-115
4.5 Educational attainment of the women members in the selected households of the sample villages 117-117
4.6 Access to various facilities under educational empowerment scheme 125-126
4.7 Inter variable Correlation Matrix for Educational Empowerment of women 137-137
4.8 Decision making capacity of the women by weighted scores 138-138
4.9 Analysis of Variance (ANOVA) for decision making index of women in the study area 141-141
4.10 Analysis of Variance (ANOVA) for the variables of educational empowerment of women in the study area 141-141
5.1 Women work participation rate in the identified C.D. blocks 145-145
5.2 Functioning of women Self-Help-Group in the sample villages 154-154
5.3 Performance of women Self-Help-Group in the sample villages 155-155
5.4 Access to Credit and Subsidy to women Self-Help-Groups in the identified C.D. blocks 157-157
5.5 Statement of loan, subsidy and repayment of loan of the women Self-Help-Groups in the sample villages. 158-158
5.6 Purpose wise distribution of internal loan within the Self-Help-Groups women members 161-161
5.7 Economic activity adopted by the women Self-Help-Groups in the identified C.D. blocks 163-163
5.8 Economic activities and income expenditure statement of the women Self-Help-Groups in the sample villages 166-166
5.9 Access to training to the women Self-Help-Groups in the sample villages 173-173
5.10 Access to various facilities under economic empowerment scheme 174-174
5.11 Impact of Self-Help-Groups in the empowerment as perceived by women respondents 175-175
5.12 Inter variable Correlation Matrix for Economic Empowerment of women 176-176
5.13 Variation in Decision Making Index for economic empowerment of women 177-177
6.1 Participation of women members in panchayats election of Assam, 2001 183-183
6.2 Participation of women members in panchayats of the identified C.D. blocks, 2007 184-184
6.3 Awareness and participation of the G.P. women members with respect to developmental programmes and issues 195-196
6.4 Women empowerment through involvement in gaon panchayats 198-198
7.1 Access to health facilities in the household of the sample villages 204-204
7.2 Marital status and index of dissimilarity 209-209
7.3 Marriage age and number of women members against their children in the selected households of the sample villages 212-212
7.4 Daily household workload and common diseases of the women members in the selected households 215-215
7.5 Linkages between rural women’s household work and health in the rural areas 216-216
7.6 Access to developmental programmes on health for empowering women 222-223
7.7 Prevalence of Social weakness as perceived by women respondents in the sample villages 236-236
7.8 Inter variable Correlation Matrix for women empowerment with respect to health 237-237
7.9 Analysis of Variance (ANOVA) for the variables of women empowerment with respect to health 238-238
