

## C O N T E N T S

CERTIFICATE	(iii)
DECLARATION	(iv)
ACKNOWLEDGEMENTS	(v)
1. INTRODUCTION	1
1.1 Generation of Nitrile Oxides	4
1.2 Properties of Nitrile Oxides	4
1.3 Addition Reactions of Nitrile Oxides with Nucleophiles	6
1.4 1,3-Dipolar Cycloaddition Reactions of Nitrile Oxides	6
1.5 Reaction of $\alpha,\beta$ -unsaturated Ketones with Hydroxylamine	17
1.6 Other Methods of Syntheses of 2-Isoxazolines	18
1.7 Reductive and Oxidative Opening of 2-Isoxazolines	18
1.8 Photochemical Transformations of Isoxazolines	21
1.9 Electrochemical Reactions of Isoxazolines	21
1.10 Synthesis of Biologically Important Compounds via 2-Isoxazolines	22

1.11 Conversion of 2-Isoxazolines to Isoxazoles	23
1.12 Scope of the Present Investigation	23
2. DISCUSSION	
2.1 Proton nmr Spectral Studies on Isoxazolines	26
2.2 Carbon-13 nmr Spectral Studies on Isoxazolines	57
2.3 Mass Spectral Fragmentation Pattern of Isoxazolines	95
2.4 Biological Activity of Isoxazolines	131
3. EXPERIMENTAL	
3.1 Synthesis of Isoxazolines	138
3.2 Chromatography	145
3.3 NMR Spectral Measurements	146
3.4 Mass Spectral Measurements	146
4. SUMMARY	147
REFERENCES	154
