ACKNOWLEDGEMENT

I am grateful to my research guide and supervisor, Dr. D. Rajagopalan, Professor and Head of the Department of Commerce, for the unstinted inspiration, encouragement and guidance he gave to complete this endeavour. But for the keen interest he took in this project and the timely advice and help he rendered, my task would have been quite formidable.

I am thankful to all the other faculty members of the Department of Commerce for their support. In particular, I would like to thank Dr. K. Chandrasekhar Rao, Reader, Department of Commerce, for the help given during the course of the work.

Thanks are also due to Ms. K. Sellam, Project Officer, Indian Institute of Technology, Madras, for helping me with the computer analyses.

I am thankful for the co-operation and suggestions given to me by the managers of the various organizations wherein this study was conducted. Without their enthusiasm and active participation in this research, this thesis would not have been possible.

Thanks are indeed due to the University Grants Commission for providing me with a Senior Research fellowship during the tenure of this research.

Lastly, I thank Mr. R. Saravanan of Microsecond Computer Center for typing this thesis work promptly.
