ACKNOWLEDGEMENTS

I owe a deep sense of gratitude to my mentors and guide, Dr. Sandeep Grover, Professor and Chairman, Department of Mechanical Engineering, YMCA University of Science and Technology, Faridabad and Dr. Ashok Kumar, Executive Director of Manav Rachna International University, Faridabad for their continuous guidance, valuable advice and suggestions from time to time. Without their motivation and guidance this task could not have been accomplished. I admire greatly the ease of my access to them and their availability for me even at the cost of their personal comfort, and my encroachment on their family’s time.

My special thanks to Dr. M.K. Soni, Executive Director, Career Institute of Technology and Management, (CITM) Faridabad who encouraged me to go for Ph.D. during his visits to our institution. My sincere thanks to all my colleagues in YMCA University of Science and Technology, Faridabad who were always positive and nice to me during my work and helped me whenever I approached them.

My thanks to industry, faculty and my students who contributed through their valuable suggestions in developing survey tool (Questionnaire) which was the base to collect an important data on industry academia interface?

My thanks to all respondent industries who took out their precious time to respond to my questions and provided an important feed back on the survey tool without which this work would not have been possible.

My thanks to all my student trainees who were instrumental in getting feed back from the respondent industries while they were on industrial training with them.

My special thanks to my late wife Ms Rita Bansal, my daughter Ms Shweta Bansal, son Sushant Bansal and daughter in law Chandna Bansal who always stood by my side, gave suggestions, edited my work and provided moral support.
I am also obliged to my all elders and seniors in my family who blessed me for accomplishing this task and to all those who directly or indirectly helped me in completion of my present work.

(VIJAY KUMAR BANSAL)
