Acknowledgement

My head bows in courtesy to "Lord Rama" who showered on me the physical and mental strength to accomplish this challenging task.

Rock is the same but a sculptor transforms it to a sculpture and a smith makes it as a stone for building and a carver makes a tomb out of it. Though all the students are equally gifted, their shaping lies on the people at whose hands they fall into. I deem it as my good luck and golden opportunity to work under the guidance of Dr. K.V. Sastry, Professor, and H.O.D. Deptt. Of Bio-sciences, M.D.U. I am deeply indebted to my guide and mentor for suggesting me the scientific problems, for his inspiring resourcefulness and supervision of the entire work. Words are ineffable to pay gratitude on the zenith of splendour, for his versatile and adroit, and invaluable guidance, kind treatment, sustained interest, encouragement, constructive and logical criticism, timely admonition and strenuous effort throughout my period of study and provide the conducive atmosphere for my work without any hitch will remain evergreen in my memory. The light candles by him will ever shine. The generosity with which Mrs. Sastry disseminates affection as always been a source of encouragement and confidence to me.

I take this opportunity to extend my sincere thanks to Dr. S.V.S. Rana, Professor and Head, Deptt. Of Zoology, CCSU, Meerut for having given me the opportunity to carry out the scientific investigations in this esteemed institution.

I am extremely thankful to Mrs. (Dr.) Vineeta shukla, Reader, M.D.U. Rohtak for her generosity towards me throughout the period of my study.
Words are inadequate to express my gratitude to my guide for motivating me with scientific vision, for rendering the great and magnificent guidance, for his timely help, encouragement and for providing me the lab facilities in accomplishing my research experiments and thesis work.

I am really short of words to express my feeling of gratitude to my respected parents (Sh. Raghubir Singh and Smt. Raj Chaudhary) for all my achievements till dates. Words fail to express thoughts to my loving brothers Goldy, Sonu and my sweet sister Bebu, their sweet affection and efforts all through my higher studies. Without their untiring help, encouragement motivation, understanding, evergreen showering of love and affection my present and future could not have been quoted, to them I bow with a gesture of thanks.

Words are insufficient and inefficient, although I convey my special words of praise and heartfelt gratitude to Dr. N.K. Chadha, Senior scientist, CIPE, Lahli, Rohtak, for rendering excellent scientific guidance, concrete and creative suggestions, timely help, necessary corrections, co-operation and encouragement in accomplishing my research experiments and thesis work.

I extend my profound admiration and gratitude to Ms. Payal Jamwal, Research Scholar, Department of Chemistry, who has been a candle burning for giving light, colour and vigour for my thesis work. I acknowledge her dedicated service with sense of commitment, sincerity, painstaking effort, academic and skilful assistance rendered throughout my thesis work is matter of praise worthy. The invaluable sacrifices she made shows the keen interest evinced by her in my progress.

I felt immense pleasure in expressing my heartiest thanks to my friends Sushila, Darshna, Seema (MP), Usha didi, Pushpa, Nita, Vijay, Aru, Ritu didi, Promila and Usha whose untinted co-operation, encouragement and sounds academic suggestions lead me to complete this research work.
I' owe a deep sense of loving gratitude to my senior Dr. Krishan Chahar for his scholarly intellectual input, skilful assistance.

It is my rational and not merely sentimental desire to express heartiest thanks to my gracious and honorable guide whose guidance and abundant interest helped me in completing my research work within the specified period.

It is my great pleasure and privilege to extend my sincere thanks to all the faculty members who have supported me to make this venture a great success by motivating, complimenting, suggesting and encouraging gracefully.

It is with sincere thanks that I acknowledge Mr. A. Aggarwal, Senior scientist, Krish Anusandhan Bhawan, New Delhi, for sharing his intellectually calibrated interaction, authentic guidance and for providing resourceful materials to carry out my research and also grateful to the authorities of ICAR for providing financial assistance to me.

I pay tribute to my naniji (Late Smt. Parmeshwari Devi), who tried her best to make me a competent confident human being of high moral though only her soul is present to give me blessing but as I am on the path of her dreams for me.

I shall be failing in my duties if I don't again admire the almighty as whole work is possible because of a unknown face which stood behind me as a strong pillar and provided me great zeal and enthusiasm by unknown sound, but known words to fulfill the dreams of that unknown, unseen, unborn face i.e. "God" on this very special occurrence on my life.

Rohtak
