Chapter I

1.1 General Introduction 1
  1.1.1 Trends in Phytotherapy 1
  1.1.2 Male Antifertility 2
  1.1.3 Male Reproductive Toxicology 2
  1.1.4 Male Contraception 5
  1.1.5 Plumbagin 8

1.2 Biology of Male Reproduction 11
  1.2.1 The Testes 12
    1.2.1.1 Sertoli cells 12
    1.2.1.2 Germinal cells 13
    1.2.1.3 Stages in the cycle of the seminiferous epithelium 14
    1.2.1.4 Leydig cells 15
    1.2.1.5 Endocrine and paracrine control of testis function 16
  1.2.2 The Epididymis 17
    1.2.2.1 Cell types in the epididymal epithelium 18
      Principal cells 18
      Apical cells 19
      Narrow cells 20
      Clear cells 20
      Basal cells 21
      Halo cells (or) Intra-epithelial lymphocytes
/ intra-epithelial macrophages

Quantitative Histology

1.1.2.2 Epididymal lumen

1.2.2.3 Roles of the Epididymis

1.2.2.4 Endocrine Control of Epididymis

1.3 Hypothesis and Objectives of the present study

Chapter II

2.1 Materials

2.1.1 Animals

2.1.2 Glassware and Chemicals

2.1.3 Test Compound

2.2 Experimental Protocol

2.3 Methods

2.3.1 Histological Studies

2.3.1.1 Light Microscopic studies adopting paraffin embedding

2.3.1.2 Quantitative analysis of the different cell types

2.3.1.3 Morphometric analysis of clear cell size

2.3.1.4. Quantitative of total number of basal cells and Morphometric analysis

2.3.1.5 Light microscopic and transmission electron microscopic studies adopting resin embedding

2.3.2 Spermatological studies

2.3.2.1 Dilution of semen

2.3.2.2 Assessment of sperm motility

2.3.2.3 Assessment of sperm vitality

2.3.2.4 Sperm morphology

2.3.2.5 Sperm counts

2.3.2.6 Sperm agglutination
2.3.3 Scanning Electron Microscopic (SEM) studies 36
2.3.4 Estimation of Proteins 37
2.3.4.1 Preparation of the sample 37
2.3.5 Sodium Dodecyl Sulphate – Polyacrylamide Gel Electrophoresis (SDS-PAGE) 38
2.3.6 Western Blot Analysis 41
2.3.7 Immunocytochemistry (ICC) 43
2.3.8 Radio-Immuno Assay of Hormones (RIA) 45
2.3.8.1 Assay of estradiol 47
2.3.8.2 Assay of testosterone 49
2.3.8.3 Assay of FSH and LH 50
2.3.9 Statistical analysis 56

Chapter III

3.1 Effect of PL on the histology of testis and epididymis at Light - and Electron microscopic level 57
3.1.1 Changes in the cauda epididymidal sperm and lumen 57
3.1.2 Changes in the testis 58
3.1.3 Changes in the epididymal epithelium 59
3.1.3.1 Apical and narrow cells 59
3.1.3.2 Principal cells 60
3.1.3.3 Clear cells 61
3.1.3.4 Basal cells 62
3.1.3.5 Intra-epithelial leukocytes 62
3.2 Quantitative histology of the epididymis 62
3.3 Morphometric analysis of clear cells 63
3.4 Quantitation of basal cells in the epididymis 63
3.5 Effect of PL on spermatozoa 64
3.6 Effect of PL on hormones 64
3.7 Effect of PL on total epididymal proteins 65
3.8 Effect of PL on localization of Cathepsin D and
Chapter IV

4.1 Salient features of the Results 67

4.2 Results of the present study compared with the available literature 68

4.2.1 Impact of PL treatment on testis 68

4.2.1.1 Sertoli cell response, premature exfoliation of germinal epithelium, lack of effect on spermatogonia 68

4.2.1.2 Damage to pachytene spermatocytes 72

4.2.1.3 Asynchrony of stages 75

4.2.1.4 Disruption of manchette microtubules 76

4.2.1.5 Development of abnormal sperm in testis and effect of PL on outer dense fiber system as, mitochondrial sheath of spermatozoa as indicators of the toxic effect of PL affecting spermiogenesis 78

4.2.1.6 Apoptosis in spermatocytes 82

4.2.1.7 Lack of effect on the Leydig cells and the levels of hormones 84

4.2.2 Impact of PL treatment on epididymal epithelium 85

4.2.2.1 Changes in principal cell 85

4.2.2.1.1 Manifestation in the Golgi apparatus of principal cell and spermiophagy 85

4.2.2.2 Changes in clear cell 85

4.2.2.3 Changes in apical cell 86

4.2.2.4 Changes in basal cell 87

4.2.2.5 Changes in narrow cell 88

4.2.6 Role of principal cells, basal cells and
4.2.3 Retention of cytoplasmic droplets by cauda epididymidal spermatozoa 89
4.2.4 Lipofuscin granules in epididymal epithelium 91
4.2.5 Development of microcanals in the epididymal epithelium 92
4.2.6 Changes in protein pattern 93
4.2.7 Cathepsin D and CD68 in the epididymal epithelium 95
4.3 On the prospective application of plumbagin as a contraceptive 96
4.4 Male Reproductive Toxic Effects of PL: A sum-up 98

Summary & Conclusion 99
