Acknowledgement

Whenever any piece of work is satisfactorily accomplished it is never the
work of one person but a number of people who silently work behind the screen
and go unheard of.

My vocabulary falls short of words to convey my profound gratitude and
indebtedness to my revered teacher and guide Dr. Usha Agarwal, M.S.,
Professor of Obstetrics & Gynaecology, M.L.B. Medical College Jhansi under
whose expert guidance and supervision I had the privilege to work. Her keen
interest, meticulous attention, valuable guidance, concrete and constructive
suggestion, constant supervision and encouragement during the pursuit of this
work made it possible for me to bring this work to the present form.

It is my proud privilege to express my profound thanks to my respected
co-guide Dr. Mridula Kapoor, M.S., Professor and Head Department of
Obstetrics & Gynaecology, M.L.B. Medical College Jhansi for her able
supervision & kind & benevolent disposition. She has been a constant source of
inspiration to me during the course of the study.

I wish to express my admiration to my respected co-guide Dr. Sushila
Kharkwal, M.D., Associate Professor Department of Obstetrics &
Gynaecology, who bestowed upon me knowledge time to time during the study
and made it possible to complete this work. I offer my sincere thanks for her
constant help, able guidance and tireless efforts.
I take this opportunity to acknowledge most humbly from the inner recess of my heart my indebtedness to Dr. Sunita Arora M.S Professor and Dr. Sanjaya Sharma Associate Professor, Department of Obstetrics & Gynecology, whose inspiring benefaction bestowed upon me generously and helped me to carry out this present work.

It is great privilege to express my deep sense of gratitude to Shri. B.D. Mathur, M.Sc, D.H.S., Associate Professor of Statistics & Demography for his valuable suggestion, which enabled me to take over the difficulties during this period.

I am deeply indebted to my esteemed parents for their love, sacrifice, care and inspiration at every moment of my life and also in this important venture.

Certainly the study would not have been possible without active participation of my husband, Dr. Hari Singh who has always been available with invaluable suggestions and unending encouragement especially when it was at the brink of collapse during the course of study. A short note of praise for my darling daughter ‘MINI’ and sweet son ‘SUNNY’ for their sweet distraction, which gave me even more inspiration to complete this mammoth task more urgently and efficiently.

This work would not have been in sight without the efficient and excellent typing by Mr. Sanjay Sachan. My thanks are due to him.

Finally I thank my study patients whose kind cooperation made this study possible.
Last, but certainly not the least, I pay my sincere prayer to the Almighty God who gave me power, blessings and encouragement to accomplish this task.

JHANSI
