ACKNOWLEDGEMENT

Most wholeheartedly I thank my guide Dr. S. Muthuswamy for introducing me into the field of conventional coordination chemistry. He has been giving me lots of encouragement, and support at every turn. He is a friend, philosopher and guide and something more also.

Even though I have taken an unduly long time to carry out this project, he patiently guided and helped me with characteristic nobility. It is not too much if I say that he is a living example of Cardinal Newman’s “Gentleman”.

I thank Sri. K. Santhanam, Secretary, National College Council, Prof. S. Thiagarajan, Principal, National College, Tiruchirapalli, and Prof. V. Thyagarajan, Head of the Chemistry Department, National College, Tiruchirapalli for granting me permission to carry out the experiments by making use of the facilities available in the college laboratory for carrying out the research work.

I thank Dr. D. Venkappayya, Professor and Head, Chemistry Department, R.E.C., Tiruchirapalli and Dr. C.N. Krishnan, Professor of Inorganic Chemistry, Annamalai University, Annamalai nagar for their expert advice.

I am thankful to Dr. M. Palanichamy, Lecturer in Chemistry, Anna University, Madras for the useful discussion he had with me regarding the stability constant determination.
I thank all the staff members of the department of Chemistry National College, Trichy for giving me constant encouragement. I thank Dr. S. Indira for clarifying certain points in my work.

My thanks are due to Dr. V.T. Sridharan, Professor and Head Of the Department of Botany National College, Tiruchirappalli for helping me in the preparation of plates for the antimicrobial screening and their interpretation.

I thank the Head, Microbiology Department, University of Agricultural Sciences, Bangalore for helping me to carry out the antimicrobial studies. I also thank the R.S.I.C., I.I.T., Madras for recording the IR spectra. My thanks are also due to the staff members of VIKAS INFOTEK, Tiruchirapalli for the neat execution of this work.

I record my thanks to Mr. M.N. Abubacker, Senior Scale Lecturer in Botany, National College, Tiruchirapalli for the useful discussion regarding antimicrobial screening work. I thank Dr. K. Vivekanandan for the timely help.

Last but not least, I thank the University Grants Commission, New Delhi, for sanctioning the Minor Research Project on Schiff bases and their complexes. [Vide F 26-1 (90) / (91) (RB-II) dated 18-4-1992].
