ACKNOWLEDGEMENT

I wish to express my sincere gratitude to Dr. G. R. Rao, Professor and Head, Department of Plant Sciences, Co-ordinator Department of Life Sciences and Member of the Syndicate, Bharathidasan University, Tamil Nadu, Tiruchirapalli, for his valuable guidance, help and unfailing interest throughout the course of the investigation and providing much needed facilities.

Grateful thanks are also to Dr. S. R. Sree Rangasamy, Professor and Head, Department of Biotechnology, Tamil Nadu Agricultural University, Coimbatore, for his constant support and valuable advice throughout the investigation and for reading and correcting the manuscript.

I wish to thank profusely Dr. N. M. Ramaswamy, P. G. Dean, Tamil Nadu Agricultural University, Coimbatore for his critical comments on the manuscript.

I express my gratefulness and deep sense of obligation to my parents for their constant encouragement, inspiration and co-operation.

I am indebted to K. P. Jeyakumar (JP XEROX AND COMPUTER CENTRE) for neat typing of the manuscript.

I sincerely thank the Bharathidasan University and SIMA, Cotton research centre, Coimbatore for providing me research fellowship. Without their financial support it would not have been possible for me to complete the work.

G. Rajaseger
