LIST OF FIGURES

1. Map of the study areas

2. Diagram showing the colony diameter (cm) of *P. tinctorius* isolates

3. Percentage of mycorrhization in *Eucalyptus tereticornis* and *Casuarina equisetifolia* hosts grown *in vitro* in association with *P. tinctorius* isolates

4. Effect of temperature on the growth of ten isolates of *Pisolithus tinctorius* after 45 days

5. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the seedling volume (cm$^3$) of nursery raised seedlings of *Eucalyptus tereticornis*

6. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the seedling volume (cm$^3$) of nursery raised seedlings of *Casuarina equisetifolia*

7. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the total plant dry weight (g) of nursery raised seedlings of *Eucalyptus tereticornis*

8. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the total plant dry weight (g) of nursery raised seedlings of *Casuarina equisetifolia*

9. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the shoot:root of nursery raised seedlings of *Eucalyptus tereticornis*

10. Effect of inoculation of *Pisolithus tinctorius* [Pt(GE) isolate] on the shoot:root of nursery raised seedlings of *Casuarina equisetifolia*

11. Pie diagram showing the influence of *Pisolithus tinctorius* on the chlorophyll content of six months old *Eucalyptus tereticornis* and *Casuarina equisetifolia*
12. Effect of inoculation of *Pisolithus tinctorius* on the total soluble and reducing sugars of nursery raised seedlings of *Eucalyptus tereticornis* and *Casuarina equisetifolia*

13. Effect of inoculation of *Pisolithus tinctorius* on the total proteins and total phenols of nursery raised seedlings of *Eucalyptus tereticornis* and *Casuarina equisetifolia*

14. Effect of inoculation of *Pisolithus tinctorius* on the total lipids and total soluble starch of nursery raised seedlings of *Eucalyptus tereticornis* and *Casuarina equisetifolia*

15. Concentrations of macro nutrients in the leaf and root tissues of *Eucalyptus* and *Casuarina* seedlings after inoculated by *Pisolithus tinctorius*
