

CONTENTS

1.	INTRODUCTION	1
2.	REVIEW OF LITERATURE	5
	2.1. Nodulation status of tree legumes	5
	2.2. <i>Rhizobium</i> Taxonomy	8
	2.3. Cross inoculation studies	12
	2.4. Characterization of <i>Rhizobium</i>	15
3.	MATERIALS AND METHODS	29
	3.1. Study Material	29
	3.2. Morphology of Nodules	29
	3.3. Estimation of Leghaemoglobin	30
	3.4. Nitrogenase activity	30
	3.5. Isolation of <i>Rhizobium</i>	31
	3.6. Identification of <i>Rhizobium</i>	32
	3.7. Cross inoculation studies	32
	3.8. Characterization studies on <i>Rhizobium</i>	34
	3.9. Numerical analysis	50
	3.10. Pot culture experiments	51
4.	OBSERVATION AND RESULT	53
	4.1. Root nodules	53
	4.2. Nodule endosymbiont	54
	4.3. Cross inoculation studies	54
	4.4. Characterization studies on <i>Rhizobium</i>	56
	4.5. Numerical Analysis	60
	4.6. Pot culture experiments	62
5.	DISCUSSION	63
	5.1. Nodule characteristics	63
	5.2. Bacterial Endosymbiont	65
	5.3. Cross inoculation studies	66
	5.4. Numerical Taxonomy	68
	5.5. <i>Rhizobium</i> as Biofertilizer	73
6.	SUMMARY	76
