ACKNOWLEDGMENTS

I express my profound sense of gratitude and heartfelt thanks to my guide and supervisor Dr. M.A. Akbarsha, Emeritus Professor and Advisor, School of Life Sciences, Bharathidasan University, Tiruchirappalli, [Formerly, Professor & Head, Department of Animal Science, (Also, Co-ordinator, School of Life Sciences)], for his valuable suggestions, constructive criticism, responsive encouragement and care on me throughout the entire period of study.

I would like to express my sincere thanks to Dr. Damodaran Chendil, Assistant Professor, Department of Clinical Sciences, University of Kentucky, Lexington, KY, USA, for his detailed and constructive comments, and for his important support throughout this work. His extensive discussions and interesting explorations have been very helpful for this study. Particularly, I owe to him greatly for the quantity and genuinity of the data- he would be convinced only if repeated twice or even thrice.

I offer my profound thanks to Dr. Doris J. Baker, Professor and Director, Division of Clinical and Reproductive Sciences, University of Kentucky, Lexington, KY, for her keen interest in my progress and the guidance in the capacity as the member of the Doctoral Committee.

I whole-heartedly thank Dr. Mansoor M. Ahmed, Scientist, Sigfried and Janet Weis Center for Research, Danville, Philadelphia, who at the initial phase of this study was at UKY and my mentor, for his encouragement and support for the present study. It was he who brought the three key role players in this thesis together- myself, Prof. M.A. Akbarsha and Dr. Damodaran Chendil.
I embrace this opportunity to thank Dr. Jurgen Rohr, Professor, Department of Pharmaceutical Sciences, University of Kentucky, Lexington, KY, for his kind support and valuable insight and cognitive contribution in the pharmaceutical part of the thesis.

I also thank Dr. S. Thirugnanam, a scientifically inclined and enlightened Siddha Practitioner, from Tiruchirappalli, Tamil Nadu, India, for providing the quality Lehyam used for the research, without which the study would not have been possible. I wish to express my appreciation to Dr. B.S. Dwarakanath, Professor, Institute of Nuclear Medicine and Allied Sciences, Delhi, for his motivation and inspiration. His ideals and concepts have had a remarkable influence on my entire career.

I wish to thank Dr. Li Li Zhu and Dr. Nur-E-Alam, Department of Pharmaceutical Sciences, University of Kentucky, Lexington, KY, for their help in isolation and identification, serial extraction and separation of compounds.

I am extremely thankful to my fellow colleagues Sowmyalakshmi Srinivasan, Dr. Seema Gupta, Dr. Girija Ramankutty, Dr. Ravshan Burikhanov, Dr. Satish Kumar Sabhapathi, Mrs. Shahin Shajahan, Dr. Madhusoothanan (ALL FROM UKY), Mr. Faisal Kunnathodi, Mr. V.S. Periasamy, Mr. A. Riyasdeen, Miss. A. Radha and Miss. C. Preethy Paul (ALL FROM BHARATHIDASAN UNIVERSITY) for the regards, efforts, suggestions and overwhelming support rendered by them. They deserve a genuine share of appreciation for their valuable assistance in different occasions.

I owe my thanks from the depth of my heart to my beloved Parents and Family members for their involvement and for all their warmth, affection, support, patience and encouragement.

Rama S. Ranga
