ACKNOWLEDGEMENT

Aspiring towards a higher pedestal in the field of education, on my seeking HIS guidance, HIS grace and blessings have been showered on me in bringing out the present work in the face of unforeseen odds and impediments. My gratitudes cannot be fathomed for the experience I gained in reaching HIM, during this work.

Dr. V. Veeraraghavan, M.Sc., Ph.D., Lecturer (SG), Department of Zoology, Jamal Mohamed College, Tiruchirappalli, presently Deputy Director, International cell, Indira Gandhi Open University, New Delhi, graciously consented to guide me and continued his guidance even from Delhi. His suggesting a typical topic, provided an opportunity to explore new avenues in this field. His perseverance and steadfast efforts in helping me through out, cannot be translated into words. His astounding acumen, mastery in presentation, guidance in shaping the thesis, meticulous moulding, eagerness to be in time to complete my work, have increased my regard for him in multitudes. Thanks is too feeble a word.

"A parent for a child is a gift of God". Sr. Elizabeth Rose, the former Principal of my college, was more than a parent. The kind heart in her not only provided facilities for my work in the college premises but also patted and encouraged me to reach my goal. I owe her my gratitude.

If someone inspired me to complete this work without default, it is none else than Prof. Dr. Magdalene Stephen, M.Sc., M.Phil., Ph.D., my Head of the Department, for which I should not fail to thank her. Permitting utilization of facilities was a great favour bestowed by her.

The generosity of Dr. C. Nainar Mohamed, M.A., Ph.D., the former Principal and Professor N. Abdul Samadh, M.A., M.Phil., the present Principal of Jamal Mohamed College, Tiruchirappalli, in permitting me to select Jamal
Mohamed College for carrying out this work, cannot be repaid by simple words of “thank you”. Much more is due to them.

Dr. S. Thangavelu, M.Sc., Ph.D., and Dr. M. Subramaniam, the former and the present Head of the Department of Zoology of Jamal Mohamed College respectively, un-hesitatingly extended their help and co-operation in the fulfilment of my work, for which I owe a lot to them.

Whenever practical difficulties arose, a helping hand was extended. When apparatus or chemicals were wanting, unhesitant offer was made. Phase contrast photomicrography in particular, was immediately forthcoming. When my guide shifted to Delhi, my orphaned feelings were effaced. Defects in practical experiments were made to disappear. Preparation of manuscript was perfected with precision. The day-to-day checking, correcting and developing the manuscript to reach its perfection in the present form, ignoring his busy schedule has strengthened my admiration of his talents multifold. His humane and meticulous approach can be seen in every part of my work. Gratitude is too small a word to express the feeling from the root of my heart to the kindest soul in the form of Dr. M. Mohamed Ibrahimsha, M.Sc., Ph.D., Lecturer (SG), Department of Zoology, Jamal Mohamed College, Tiruchirappalli, whose participation is brought out by a little reference above.

My colleague Dr. Alice Marcus, M.Sc., M.Phil., Ph.D., Lecturer (SG), was a source of solace and comfort, whenever I faced difficulties in my work. Her kind and encouraging words gave me the strength to repeat my experiments till I reached success. Her timely help in purification experiments, hastened the results. Mr. Marcus, her husband, was not lagging behind in encouraging me. I should not fail to thank this kind hearted couple.

My colleague Miss M. Sakunthala, M.Sc., M.Phil., Lecturer (SG) extended all help and stood by me in successfully completing of gel
electrophoresis. Sparing her precious time, at the cost of her own research work, was an act of sacrifice, for which I owe her immensely.

All my other colleagues in my department and the non-teaching staff never failed at any time to provide me all facilities, help, encouragement throughout my research work. Paucity of space prevents me from referring individual names. I am indebted to them.

Failing to mention my teacher, former Principal of my College and Head of the Department of Zoology, Sr. Dona, B.A. (Hons), M.Phil., Ph.D., will be an act of unfaithfulness. She is one who granted the opportunity to join my esteemed institution and encouraged me always. Even after she left our college, she has been praying and patting me to fulfil my work. Her contribution in my destiny shaping was tremendous. I am duty bound to thank her.

The staff members of Zoology department, Jamal Mohamed College, never treated me as a stranger. Their seeming and unseeming help is also a stone in the structure of my research work. My thanks are due to them.

But for the University Grant Commission's fellowship grant for the first year of my research work, under Faculty Improvement Programme, it would not have been immediately within my reach to see this day of fulfilment. I owe many thanks to them.

My gratitudes are due to Dr. Phillip Thomas, M.B.B.S., Ph.D., Professor of Microbiology, Joseph's Eye Hospital and the Head of Thomas Diagnostic and Research Centre, Tiruchirappalli, and Dr. Sekar, M.Sc., Ph.D., Reader, Department of Bio-technology, Madurai Kamaraj University, Madurai, for providing bacteria without any return or reward. Dr. G. Subramaniam, M.Sc., Ph.D., Director, National Facility for Marine Cyanobacteria, Bharathidhasan University, Tiruchirappalli, unhesitatingly extended the facility for freeze drying.
I shall be failing in my duty if I omit Sr. Annie Xavier, present Principal of my College and also Head of the Department of Botany, in generously permitting me to use the UV-Spectrophotometer in her lab. With her direction, Mr. Raveendran, her student and Miss Parvathy of her Department assisted me in recording the readings. I owe them all a lot. Mr. Rex, the College Technician was always at hand to rectify every default in power supply.

I also thank Miss Ganga, M.Sc., M.Phil., Lecturer in Zoology, Holy Cross Junior College for Women, Hyderabad, Miss Kala, Miss Gomathi, Miss Vanishree and Miss Nirmala, my former students, at present carrying on research in different Institutes, who helped in their own way to carry out my work successfully.

Dr. Shunji Natori, Faculty of Pharmaceutical Sciences, University of Tokyo, Tokyo, Japan, was prompt in forwarding suggestions and clearing my doubts, which went a long way in arriving at my results. Dr. Daniele Hoffmann, University of Louis Pasteur, Strasbourg, France, furnished an idea to overcome certain difficulties during my experiments. I am bound to convey my hearty gratitude to them also.

The perfection of the format, new vistas in graphs, suggestions in the arrangement of the material, tireless efforts to rectify and present any number of copies and presentation of the completed work in the form it is now in, is all due to Mr. K. Selvaraj, Foreman, B.H.E.L., Tiruchirappalli, an expert in computer operation and a friend of my husband. Grasp of the requirements and converting them into a neat format, is a special talent of his. I owe him innumerable grattitudes. Mr. A. Ramalingam, a brotherly soul, permitted the use of computer and its latest technology, for which I am indebted and thankful.

'Fly' is the object of my research. Every letter from Madras, of Dr. A.C. Padmanaban, Ph.D., former Professor at Regional Engineering College,
Tiruchirappalli, a friend, philosopher and guide to our entire family, did find a reference to the fly. Whenever, I was depressed and faltered from my path, it was he who gave a fatherly pep-talk, infused enthusiasm and put me on the rails to continue my work by picturising his own difficulties. It was God’s will that he left us before he could see the fruits of his aspiration. His wife, Mrs. Booma Padmanabhan, M.A., filled the vacuum. My heart beats every time with gratitude for them.

The seed of education was sowed, nurtured with affection and moral backing in me to bloom to its present stage by my parents, who look upon me from Heaven with Blessings which I yearn to deserve. No words in this Universe will equal their inspiration.

With immense pride and pleasure I am bound to proclaim that this humble work of mine was an outcome of measureless sacrifice, love, sharing, understanding, forgiveness, generosity, care and concern of my dear husband Syed Tajuddeen Madani and my loving children Sajjad, Kaneez and Bathul. They understood me in times of difficulties, spared me in times of need, shared my responsibilities, advised me to carry out my work patiently and properly, boosted my desire to seek my destiny. I am eager to reciprocate their act by helping them reach their pinnacle of success. My near and dear relatives, who extended their helping hand and appreciations, encouraged me to carry out this little piece of work, for which I am indebted to them.

To all those whom I have unintentionally omitted to refer, do also I convey my humble thanks.

[FATHIMUNNISA]
