God's Grace and the determined support and enlightened guidance of a number of scholars enabled me to complete this research work.

I am immensely indebted to my revered guide, Rev.Fr. Dr. M. Sebastian, S.J., M.A., Ph.D. In selecting the problem and all connected research activity, his valuable guidance and constant encouragement were a source of inspiration to me. I stood to gain a lot from his detailed criticisms and constructive suggestions. His zeal for perfection and urge for timely work enabled me to finish the work on time. For all these, I acknowledge his services with great sense of gratitude and academic fidelity.

I express my hearty thanks to Dr S. Varadarajan, M.Sc.(Ag.), M.S. (Purdue), Ph.D., D.I.Fr., Professor of Agricultural Economics, Tamil Nadu Agricultural University, Madurai. But for his friendly counsels and directions, and for his sympathetic and patient bearing towards me during my discussions on various aspects of this work, particularly while completing the empirical analysis of data, I would have been lagging very much behind in my analysis work.
I wish to place on record my thanks to the management and particularly to the Principal, Prof. N. Abdus Samadh, M.A., M.Phil. Jamal Mohamed College, Tiruchirapalli for the encouragement given to me. My thanks are also due to the Management, St Joseph's College, Tiruchirapalli for providing me an opportunity to take up this work and extending library and other facilities of the college.

I wish to thank profoundly Dr M. V. Nadkarni and Dr G. Thimmaiah of ISEC, Bangalore, Dr Brăhmananda of Bombay University, Dr R. Vasudevan, General Manager, BHEL, Tiruchirapalli and Dr K. Thiruvenkatachary of National College, Tiruchirapalli for their valuable assistance at various stages of this work.

I should place on record my sincere thanks to my students, Messrs. K. Kaliamurthy, A. Yenose and Saleem Batcha for their devoted assistance in all my efforts of preparing this thesis.

The officials of the Ariyalur, Dalmiapuram and Puliyur Cement Factories, Tamilnadu Pollution Control Board, Madras and Tiruchirapalli and the Government Health, Animal Husbandry and Agricultural Departments, richly deserve my sincere thanks for furnishing necessary information connected with this research.
I sincerely thank my friend, Mr R. Balasubramanian, not only for his encouragement, but also for his help in typing the rough drafts.

It is my duty to thank Mr S. Venugopal for preparing the final copy of the thesis in the present format.

On the home front, I owe very much to my wife, Mrs. Meharunnisa Begum, M.Sc.,M.Ed.,M.Phil. I thank her for her constant encouragement, assistance, forbearance, understanding and excellent home management, which enabled me to complete this work on time.

Above all, I submit myself to the Grace of God Almighty for His Blessing in completing this research work successfully.

M. H. Abubacker
