LIST OF FIGURES

Fig. 1.1 Components contributing to cardiovascular risk show large overlap; making it difficult to assess singular contributions to overall cardiovascular risk

Fig. 2.1 Progression of atherosclerosis and possible late stage vascular complications

Fig. 2.2 Molecular structure and morphology of human C-reactive protein
   (a) Negatively stained electron micrograph showing the typical pentameric disc-like structure face-on and side-on (arrows)
   (b) Ribbon diagram of the crystal structure, showing the lectin fold and the two calcium atoms (spheres) in the ligand-binding site of each protomer
   (c) Space-filling model of the CRP molecule, showing a single phosphocholine molecule located in the ligand-binding site of each protomer

Fig. 2.3 Mechanisms relating high-sensitivity C-reactive protein to the development and progression of atherothrombosis

Fig. 2.4 High-sensitivity C-reactive protein was an independent predictor of cardiovascular risk in 9 large prospective studies across diverse populations

Fig. 2.5 Involvement of proatherogenic high-sensitivity C-reactive protein in atherogenesis

Fig. 2.6 Biological actions of isoprenoids. Diagram of cholesterol biosynthesis pathway showing the effects of inhibition of HMG-CoA reductase by statins

Fig. 2.7 Regulation of Rho GTPase by isoprenylation

Fig. 2.8 Antioxidative mechanisms of statins

Fig. 2.9 Secondary prevention statin trials

Fig. 2.10 Primary prevention statin trials

Fig. 3.1 Study design (Cardiovascular disease)

Fig. 3.2 Study design (Stroke)

Fig. 4.1 Mean levels of high-sensitivity C-reactive protein in group I, II and III

Fig. 4.2 Mean levels of total cholesterol in group I, II and III

Fig. 4.3 Mean levels of low-density lipoprotein cholesterol in group I, II and III

Fig. 4.4 Mean levels of triglycerides in group I, II and III
Fig. 4.5 Mean levels of high-density lipoprotein cholesterol in group I, II and III
Fig. 4.6 Mean levels of very low-density lipoprotein cholesterol in group I, II and III
Fig. 4.7 Mean levels of non-HDL cholesterol in group I, II and III
Fig. 4.8 Mean levels of apolipoprotein B in group I, II and III
Fig. 4.9 Mean levels of apolipoprotein A-I in group I, II and III
Fig. 4.10 Mean levels of TC to HDL cholesterol ratio in group I, II and III
Fig. 4.11 Mean levels of LDL cholesterol to HDL cholesterol ratio in group I, II and III
Fig. 4.12 Mean levels of TG to HDL cholesterol ratio in group I, II and III
Fig. 4.13 Mean levels of non-HDL to HDL cholesterol ratio in group I, II and III
Fig. 4.14 Mean levels of apolipoprotein B to A-I ratio in group I, II and III
Fig. 4.15 Mean levels of apolipoprotein B to HDL cholesterol ratio in group I, II and III
Fig. 4.16 Mean levels of uric acid in group I, II and III
Fig. 4.17 Mean levels of total cholesterol in group I, IV and V
Fig. 4.18 Mean levels of low-density lipoprotein cholesterol in group I, IV and V
Fig. 4.19 Mean levels of triglycerides in group I, IV and V
Fig. 4.20 Mean levels of very low-density lipoprotein cholesterol in group I, IV and V
Fig. 4.21 Mean levels of high-density lipoprotein cholesterol in group I, IV and V
Fig. 4.22 Mean levels of non-HDL cholesterol in group I, IV and V
Fig. 4.23 Mean levels of TC to HDL cholesterol ratio in group I, IV and V
Fig. 4.24 Mean levels of LDL cholesterol to HDL cholesterol ratio in group I, IV and V
Fig. 4.25 Mean levels of TG to HDL cholesterol ratio in group I, IV and V
Fig. 4.26 Mean levels of non-HDL cholesterol to HDL cholesterol ratio in group I, IV and V
Fig. 4.27 Mean levels of high-sensitivity C-reactive protein in group I, IV and V
Fig. 4.28 Mean levels of serum glutamic oxaloacetic transaminase in group I, II and III
Fig. 4.29 Mean levels of serum glutamic pyruvic transaminase in group I, II and III
Fig. 4.30 Mean levels of bilirubin in group I, II and III
Fig. 4.31 Mean levels of serum glutamic oxaloacetic transaminase in group I, IV and V
Fig. 4.32 Mean levels of serum glutamic pyruvic transaminase in group I, IV and V
Fig. 4.33 Mean levels of creatine phosphokinase in group I, II and III
Fig. 4.34 Mean levels of urea in group I, II and III
Fig. 4.35 Mean levels of creatinine in group I, II and III
Fig. 4.36 Mean levels of urea in group I, IV and V
Fig. 4.37 Mean levels of creatinine in group I, IV and V

LIST OF PLATE

Plate 4.1 Electrophoretic patterns of lipoproteins
