ACKNOWLEDGEMENTS

From the beginning it was clear to me...
this is not about me or what I can do,
rather this is about what God wants me to do and
and how he enables me to do it.

First and foremost, I graciously gratitude the one up above us all for giving me my health, my strength and the stamina to withstand the rough roads before me... may be I am made out of enamel... I thank you for sending me good-hearted honest people to help assist me in achieving this degree.

I place on record with high gratitude and humble indebtedness to His Holiness Srimad Andavan Swamigal, Founder, Srimad Andavan Arts and Science College for his benign blessings and motivation towards Herbal Research.

However, life brought me to unexpected areas so at this point I am thanking people who have helped me in preparing this PhD thesis. I would like to thank all the people who are not named below but who have been very helpful in creating this thesis. O.K... this is going to take a while, it's been a rough road so I have a lot to say, so don't be surprised if it is a tiny wee bit too long...

Working on a PhD project is more than just learning the scientific facts, obtaining the scientific findings and arriving at conclusions presented in the thesis. PhD training helps in building up scientific and analytical thinking, learning to study everything with a critical eye and promotes developing strong attitudes. My beloved guide Dr. P. Brindha, (Dean, Biosciences, Srimad Andavan Arts and Science College, Tiruchirappalli) directed me to realize that and to develop these skills. Her patience, compassion, wisdom, and encyclopedic knowledge have greatly humbled my educational experience during the attainment of my doctoral degree. I thank her
for all the times being patient and resisting my turmoil & chaotic moments during these past years, and for her guidance, support, advice, and her optimism that gave me, and will continue to give me, the courage to succeed. May God give her the best of health always ... I honestly couldn’t have made all those deadlines without her and I would not be achieving this degree at the time required without her assistance. She is an awesome dudette!

Special thanks to my advisory committee member, Dr. T. Selvaraj, (Coordinator, Department of Botany & Microbiology, AVVM Sri Pushpam College (Autonomous), Poondi-613 503, Thanjavur). His perpetual energy and enthusiasm in research had motivated me. He was always accessible and willing to help me in my research. His insight to medicinal plants research is second to none. His true scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspired and enriched my growth as a student, a researcher and a scientist want to be. Besides, he set an example of a world-class researcher for his rigor and passion on research.

I extend my heartfelt thanks to Shri. N. Kasthuri Rengan, Secretary, Srimad Andavan Arts and Science College, Tiruchirappalli. I am thanking him for the great support and encouragement that he gave me. Thank you doesn’t seem sufficient but it is said with appreciation and respect. It is indeed a blessing to be able to know a person like him.

I admire the persistent and meticulous attitude of Shri. V. S. Narasimhan, (Former Secretary, Srimad Andavan Arts and Science College, Tiruchirappalli). Despite his hectic schedule as a secretary, he offered advice and suggestions whenever I required them. His unflinching courage and conviction will always inspire me, and I hope to continue, in my own small way.

I wish to express my sincere thanks to Dr. K. Prema, Director, Srimad Andavan Arts and Science College, Tiruchirappalli, for giving me a learning
environment to grow me personally as well as professionally and permitting me to make this work at the time of need. Her support and understanding helped me overcome all the difficulties of being a part time student. She tirelessly responded to my requests with a broad smile on her face.

I am grateful to Dr. S. Nagarajan, Principal, Srimad Andavan Arts and Science College for his support and encouragement.

I am deeply indebted to, Ms. J. Radhika, Head, Dept. of Biochemistry, Srimad Andavan Arts and Science college, Tiruchirappalli, a warm extended gratitude for her educational and motivational support, understanding, and encouragement which has given me the chance to excel and succeed ... I thank you warm-heartedly.

Further gratitude to the following people who believed in me and helped me through these doctoral degree years; whether it be advise or helpful hands through experiments or just cheering me up and letting me know there really exists a light at the end of this tunnel ... I thank Ms. G. Jothi, Mr. G. Sridharan, Mr. N. Agnel Arul Jhon and Ms. B. Saritha (Staff members, Dept. of Biochemistry, Srimad Andavan Arts and Science College, Tiruchirappalli) for their friendship, their heart of gold, their kindness, patience, compassion, and abundance of scientific knowledge, as well as their lending heart and open ears, have all helped me through the rough roads of obtaining this degree.

Further thanks to those whose helpful advice, friendship and encouragement made my journey a little less bumpy: Mr. K. Ramesh, Ms. D. Rajeshwari (Lab Assistants, Dept of Biochemistry, Srimad Andavan Arts and Science College, Tiruchirappalli)

Words fail to express my appreciation to Dr. R. Sivakumar for being unselfishly let his intelligence, passions and ambitions collide with mine. I was
extradinorily fortunate in having him as my M.Phil Research Supervisor. I could never embark and started all of this without his prior teachings in myocardial infarction and thus opened up unknown areas to me. Thank You, Sir.

I am very grateful to Ms. K. Rama (Former Head, Dept. of Biochemistry, Srimad Andavan Arts and Science College) for her stimulating discussions, suggestions, encouragement and for transferring her passion and positive attitude to me in all our conversations. I am proud to record that I had an excellent opportunity to work with an exceptionally experienced person like her.

My extended gratitude goes to Mr. T. Muralidharan, Ms. Vidhya Venkatesh, Mr. N. Karthikeyan and Mr. V. Muthukumar. I thank them for helping me to get through the difficult times, and for all the emotional support, camaraderie, entertainment and caring they provided. I thank them for their support and belief in me when the rest of places seem to crumble down on me... all their friendships and advice will hold a place in my heart.

To all my good friends and for their support, advice, encouragement, honest friendships, and their belief in me, all of which have made me keep my sanity throughout the course: Mr. R. Parthasarathy, Mr. R. Sivasubramanian, Ms. M. Abeetha, Ms. S. Sumitha, Mr. V. Pradeep, Mr. K. V. Anand, Ms. J. Jayasri, Ms. S. Juliat Shobana, Ms. D. Jeevitha, Mr. R. Prakash, Ms. K. S. Renganayaki, Ms. G. Sarala Devi, Ms. R. Praveena, and Ms. S. Suganthi and everyone else I missed...

I wholeheartedly acknowledge Dr. S. Kathirvel, Asst. Professor, Dept. of Veterinary Surgery and Radiology, Dr. P. Mekala, Asst. Professor, Dept. of Pharmacolgy and Toxicology, and Dr. T. Vinay Bhagat, PG Scholar, Dept. of Veterinary Surgery and Radiology, Veterinary College and Research Institute, Namakkal. I am grateful that in the midst of all their activity, they accepted to help
me in recording ECG of the experimental animals for this study. It is a pleasure to convey my gratitude to them in my humble acknowledgement.

My special thanks to Mr. M. Bhalakumar, Ms. Sudha Bhalakumar and Ms. S. Gowri, My Café, Tiruchirappalli for their technical assistances in formatting the text and Photoshop works. Without them, this thesis wouldn’t have been possible.

My deepest gratitude goes to my family for their unflagging love and unequivocal support throughout, as always, for which my mere expression of thanks likewise does not suffice. Their patience, understanding nature and support mean the world to me. I am indebted to my father Mr. V. Muthusamy for his care and love. As a typical father in an Indian family, he worked industriously to support the family and spare no effort to provide the best possible environment for me to grow. He had never complained in spite of all the hardships in his life. I cannot ask for more from my mother Ms. V. Pitchaiammal. I have no suitable word that can fully describe her everlasting love to me. I remember her constant support when I encountered difficulties. My brother Mr. M. Sivasankar who bore me in fulfilling my dreams, supported me and loved me, deserves a special mention. From the start until the accomplishment of this manuscript they have been the source of strength and encouragement. It wouldn’t have been this bearable if I didn’t have the three of them in my life.

For any errors or inadequacies that may remain in this work, of course, the responsibility is entirely my own.

M. Nivethetha
