Acknowledgements

First and foremost, praises and thanks to Allah; the Almighty, for the immense blessings He has bestowed upon me throughout my life and for providing me enough opportunities and granting the capability to proceed successfully.

Words are not sufficient for expressing my deepest gratitude and indebtedness to my esteemed advisor Professor Athar Ali Khan for his continuous support, strong motivation, affectionate attitude and patience during the whole period of the study. I will be forever grateful for the insightful comments and constructive criticisms lended by him at different stages of my research. I have been fortunate to have an advisor who gave me the freedom to explore on my own, and at the same time provided the guidance to recover when my steps faltered.

I express my sincere thanks to Prof. Qazi Mazhar Ali, Chairman, Department of Statistics and Operations Research, Aligarh Muslim University, Aligarh, for furnishing all necessary facilities to complete this work well within the stipulated time.

I am enormously pleased to place on record my profound gratitude and heartfelt regards to all the faculty members of the department, Prof. Mohammad Jameel Ahsan, Prof. Abdul Bari, Prof. Ariful Islam, Prof. Aquil Ahmed, Dr. Syed Sohaib Hasan, Dr. Rafiquullah Khan, Dr. Haseeb Athar, Dr. Shakeel Javaid, Dr. Md. Jahangir Shabbir Khan, Dr. Zaki Anwar, Dr. Mohammad Faizan, Dr. Irfan Khan, Dr. Ahmad Yusuf Adhami and Dr. Md. Arshad for their whole-hearted cooperation.

It is a pleasure for me to express my gratitude to all the non-teaching staffs of the department for the help they rendered me during this work.
Of all the important people involved in my work, I am particularly grateful to Mr. Tanwir Akhtar, Ms. Yasmin Khan, Ms. Shagufta Yasmeen and Najrullah Khan, who were of immense help during my research work. Also, I am greatly obliged to all my senior research colleagues, especially, Ms. Zubdah-e-Noor, Ms. Sana Iftikhar, Ms. Sanam Haseen for their incessant support, encouragements and fruitful discussions.

My friends Ms. Fatima Siddiqui, Ms. Sana Shahab do deserve a special mention for their lively company. I am especially thankful to my junior and roommate, Ms. Aaisha Khatoon for having being so supportive during my busy schedule of thesis writing and providing me an appropriate environment for the studies. I also appreciate the help and support from all the people who directly and indirectly helped me in the successful completion of this thesis.

Although, mere words cannot compensate for the noble sacrifices of my parents, yet, I would like to thank my father and mother, who have constantly sacrificed their comforts and emotions for the sake of my progress. I fall short of words to thank my sisters and brother-in-laws who have always been my mentor, my strength, encouragement and motivation throughout my academic trajectory.

I would take this opportunity to sincerely acknowledge the University Grants Commission (UGC), Government of India, New Delhi, for providing financial assistance in the form of Maulana Azad National Fellowship, which buttressed me to perform my research comfortably.

On a different note, I would like to thank the developers of free software, especially, R, JAGS for providing the statisticians, some great means to relate the theoretical ideas with the real-world. Also, I am grateful to the developers of the LATEX software for making available to us, an advanced typesetting system best suited for producing statistical and mathematical documents of high typographical quality.

Last but not the least, my heart fills with earnest gratitude to pay the tributes to Baani-e-Darsgaah, Sir Syed Ahmad Khan. May Allah bestow upon him, His maghfirat and rahmat.
