

## Acknowledgements

'Vyaye Krute Vardhart ev nityam, Vidya Dhanam Sarva Dhane Pradhanam' : As you consume or spend, it increases; as you share, it expands. Education is the best wealth among all the wealth anyone can ever have. And with the God's grace, I have been very lucky to have that wealth in a name of a degree called, Doctor of Philosophy.

On the verge of Completion of my Ph.D. degree, I do realize that it is probably the most exigent activity of first 28 years of my life. The best and worst moments of my doctoral journey have been shared with many people. It has been a great privilege to spend several years in the Department of Chemistry, Saurashtra University-Rajkot, and its members will always remain dear to me.

First and foremost, my heartfelt thanks to my guide, **Prof. Anamik K. Shah** for giving me the opportunity to work under his guidance. He has been a constant source of encouragement for me to work hard. I am also thankful for introducing me to this interesting topic and for his constant advice, perpetual inspiration, and constructive criticism. His lab has provided wonderful research facility, positive work environment and support so that I could learn whole a lot in this period of time. I would say that I got my role model in a guide. I highly admire his regularity, sincerity towards work and would try to follow at least few principles of his life so that I can be better and better one day. Thank you so much.

I would like to show my gratitude towards **Prof. P. H. Parsania**, Head of Department, Department of Chemistry, Saurashtra University, for providing me necessary faculties of Department of Chemistry, Saurashtra University, and Center of Excellence, NFDD Complex during my research work. I would like to thank him for his support and encouragement. With these I would also like to acknowledge nonteaching staff of department for helping me in my time of need.

I'm also grateful towards University Grants Commission for providing financial support via UGC meritorious fellowship program.

I would like to thank all my friends for the great time I have always had with them. Apart from the fun, my friends have also been a great source of learning and inspiration. Thanks a lot to my research team members Bharat, Sabera, Pratik, Dilip, Himanshu, Vipul, Mital, Rupali,

Dipti, Ashish, Madhvi, Hetal, and Krunal for helping me in my every steps of problem. I am also thankful to my juniors Hardik, Parth and Jayu for helping me during their free time. There are many others, whom I would like to mention here, but the list is too long and the space is too short. I will always cherish the moments I have shared with all my friends.

I want to express my special thanks to Mr. Paras Vekariya, Pinakin Kathiriya, Gaurav Bhola, Krunal Maheriya, Yashvantsing Jadeja for his selfless help in various spectroscopic analyses.

Very special thanks to **Dr. Rajesh Kakadiya** and **Dr. Bipin Pandey** for his help and encouragement during my Ph.D.

Of course no acknowledgments would be complete without giving thanks to my parents and my wife (Vaishali). Both have instilled many admirable qualities in me and given me a good foundation with which I could go ahead and chase my dream. They've taught me about hard work, self-respect and the actual meaning of persistence and independence. Both have always expressed how proud they are of me and how much they love me. Along with my parents, I would also like to sincerely thank my sisters, brother-in-laws, niece and nephew for their love, understanding and constant encouragement.

Above all, my heart goes out to god, in gratitude, for the little forms of blessings showered upon me throughout my life and carrier.

**Denish J. Viradiya**
