DECLARATION                        |   | i
CERTIFICATE                        |   | ii
ABSTRACT                           |   | iii
ACKNOWLEDGEMENT                    |   | iv
LIST OF FIGURES                     |   | ix
LIST OF TABLES                      |   | xi
LIST OF SYMBOLS                     |   | xii
1. INTRODUCTION                     |   | 1
    1.1 General                     |   | 1
    1.2 Organization of the Thesis  |   | 5
    1.3 Summary                     |   | 5
2. LITERATURE REVIEW                |   | 6
    2.1 General                     |   | 6
    2.2 Steel Fiber Reinforced Concrete |   | 6
    2.3 Mechanical Properties of Steel FRC |   | 7
    2.4 Fiber Reinforced Concrete Exposed to Impact Load |   | 8
    2.5 Two-Parameter Weibull Distribution |   | 18
    2.6 Multivariate Linear Regression |   | 19
    2.7 Objective and Scope         |   | 20
    2.8 Summary                     |   | 21
3. MATERIALS PROPERTIES AND MIX PROPORTIONS |   | 22
    3.1 General                     |   | 22
    3.2 Materials                   |   | 22
        3.2.1 Cement                 |   | 22
        3.2.2 Fine Aggregate        |   | 23
        3.2.3 Coarse Aggregate      |   | 23
        3.2.4 High Range Water Reducing Admixture |   | 24
        3.2.5 Steel Fibers          |   | 24
3.3 Mix Design
3.4 Mix proportions
3.5 Mixing procedure and specimen moulding
3.6 Summary

4. EXPERIMENTAL METHODOLOGY
4.1 General
4.2 Testing of Fresh Concrete - Slump Test
4.3 Testing of Hardened Concrete - Static Test
   4.3.1 Compressive Strength
   4.3.2 Splitting Tensile Strength
   4.3.3 Flexural Strength
   4.3.4 Modulus of Elasticity
4.4 Impact Testing
   4.4.1 Drop Weight Impact Test on 150 mm Diameter Cylinder and Prisms specimens
   4.4.2 Drop Weight Impact Test on 100 mm Diameter Cylindrical Specimen
   4.4.3 Drop Weight Impact Test on 100 mm Cubical Specimen
   4.3.3.1 Ultrasonic Pulse Velocity Test
4.5 Summary

5. FRESH AND MECHANICAL PROPERTIES OF FRC
5.1 General
5.2 Property of Fresh Concrete - Slump Test
5.3 Properties of Hardened Concrete - Static Test
   5.3.1 Effect of Fiber on Compressive Strength of Concrete
   5.3.2 Effect of Fiber on Splitting Tensile Strength of Concrete
   5.3.3 Effect of Fiber on Flexural Strength of Concrete
   5.3.4 Effect of Fiber on Modulus of Elasticity of Concrete
5.4 Summary

6. RESULTS AND DISCUSSION ON DROP WEIGHT IMPACT TEST
