ACKNOWLEDGEMENT

The author is immensely thankful to his respected guide Dr. K. SUBRAMANIAN, Assistant Professor in Civil Engineering for his guidance, valuable suggestions and continuous assistance in carrying out this work successfully. Without his deep involvement, sustained interest and inexorable encouragement this work could not have been completed.

The author wishes to thank Dr. R. PRABHAKAR, Principal, who gave necessary permission and provided required facilities for carrying out this work. He is grateful to his Head of the Department Dr. A. SETHURATHNAM for his kind cooperation and participation in the work. The author expresses his sincere gratitude to the previous Heads of the Department Dr. M. INBASAKARAN and Prof. R. KRISHNAMOORTHY for their patronage.

The author extends his profound sense of gratitude to Prof. R. K. SIVANAPPAN, former dean and Director, Water Technology centre, Tamilnadu Agricultural University, Coimbatore, Dr. S. THAYUMANAVAN, Director, Centre for Environmental studies, Anna University, Chennai, Dr. G. RAVIKUMAR, Assistant Professor in Civil Engineering Anna University, Chennai and Dr. S. MOHAN, Associate Professor, Department of Civil Engineering, Indian Institute of Technology, Madras for their valuable guidance in selecting this topic and continuous support in technical matters.

The author expresses his sincere thanks to Prof. M. RAGUNATHAN, Former Professor of Civil Engineering for augmenting the computer and testing facilities in the hydraulics laboratory to carry out this study successfully.
The assistance and cooperation given by Mr. M. Kalaiarasu, in-charge of Hydraulics Laboratory and the spontaneous involvement, and untiring efforts rendered during this work by his colleagues Mr. S. Ramdass, Mr. P. Vinayagam, Mr. K. Sekar and Mr. R. S. Sridhar by sparing their valuable time are gratefully acknowledged.

The assistance given by Dr. V. Selladurai, Professor of Mechanical Engineering, Mr. P. Sivasamy, Mr. K. Shanmugam and workshop staff in fabricating the experimental setup are acknowledged.

The author owes a lot to his colleagues Prof. E. Ramasamy, Prof.C.M.K.Selvaraj, Prof.M. Dhanabalakrishnan, Prof. A. Samsonraj, Mr. S. Shanmugam, Mrs. S. Uma, Mr.K.Divakar, Mr. C. Arumugam, Mr. V. Nagarajan, R. Bharathi and Mr. S. Arulselvan and technical staff Mr. M. Sampath, Mr. P. Sivasamy Mr. G. Adimullah and Mr. K. Palanisamy for their moral support and encouragement and other colleagues and students who directly or indirectly involved in this work.

The management of Coimbatore Institute of Technology, Coimbatore and AICTE, New Delhi is heartily thanked for providing all the facilities and financial assistance for accomplishing this task. The author deems it a great pleasure to place on record his gratitude to his Wife Mrs.R.Kamalam, his son Mr. R. Arun and daughters Miss. R. Deepthi and Miss. R. Preethi for their patience understanding and moral support during this research work.
