1. INTRODUCTION
1.1 Benefits of Middleware 1
1.2 Existing Middleware 2
  1.2.1 Asynchronous Middleware 4
  1.2.2 Publish-subscribe Middleware 5
  1.2.3 Data Sharing Middleware 7
  1.2.4 Adaptive Middleware 9
  1.2.5 Reflective Middleware 9
  1.2.6 Policy Based Middleware 11
  1.2.7 Web Service Architecture 14
  1.2.8 Logical Mobility 16
  1.2.9 Universal Interoperable Core 17
1.3 Middleware For Smart Environments 18
  1.3.1 Smart Space Lab 19
1.4 Middleware For Mobile Computing 20
1.5 Review of Work Done and Drawbacks 24
1.6 Objectives of Proposed Work 25
1.7 Research Work Done in This Thesis 25
  1.7.1 Context Aware Middleware
  1.7.2 Smart Spaces
  1.7.3 Interoperability
  1.7.4 Cross Layer Approach
  1.7.5 Service Discovery and Routing Protocols
  1.7.6 Peer to Peer Clustering and Security
  1.7.7 Security
1.8 Organization of the Thesis 28

2. MOBILE DYNAMIC REFLECTIVE CONTEXT AWARE MIDDLEWARE
2.1 Reflective Context Aware Middleware for Mobile Adhoc Networks 33
2.2 Reflective Framework 34
  2.2.1 Concrete Mapping 35
  2.2.2 Abstract Mapping 37
  2.2.3 Implementation of Mapping Components 37
  2.2.4 Abstract to Concrete Mapping 38
  2.2.5 Resource Management 38
  2.2.6 Security Management 39
2.2.6 Security Management
2.3 Automatic Cycling Test
2.4 Context Awareness
2.4.1 Middleware Features
2.4.2 Context Aware Middleware
2.4.3 Selection of Utility Function
2.4.4 Context Platform
2.5 Layered Middleware Approach
2.6 Quantitative Results of the Architecture
2.6.1 Performance of Existing Middleware
2.6.2 Memory Foot Prints in the Middleware Architecture
2.6.3 Seamless Component Insertion in the Middleware
2.6.4 Results and Discussions

3. SMART SPACES
3.1 Smart Space Architecture

4. INTEROPERABILITY
4.1 Interoperability of Smart Spaces
4.2 Interoperability on Cross Layering Architecture
4.3 Conclusions

5. CROSS LAYER APPROACH
5.1 Layers of Cross Layer Approach
5.2 Conclusions

6. SERVICE DISCOVERY AND ROUTING PROTOCOL
6.1 Cross Layer Support to Service Discovery
6.2 Routing Protocol

7. PEER TO PEER CLUSTERING AND SECURITY
7.1 Peering Module
7.2 Architecture of Smart Space with Peering nodes
7.3 Service Discovery Peer Architecture
7.4 Service Matching Procedure
7.5 Advertising Service Group
7.6 Clustering Algorithms
7.7 Existing Algorithms
7.8 Proposed Clustering Algorithms
7.8.1 Swarm Intelligence Based Honey Bee Optimization Algorithms
7.9 Security

8. TESTING AND RESULTS
8.1 Results and Conclusions
8.2 Qualitative Results of Protocols on Middleware

9. CONCLUSION
9.1 Discussion of the Research Results of the Thesis
9.2 Scope For Further Work
