ACKNOWLEDGEMENTS

The author's heartfull thanks are due to Dr. P. Radhakrishnan, former Principal and Dr. S. Vijayarangan, present Principal of PSG College of Technology and the Management of PSG Institutions for all the help provided in connection with this research work.

The author is grateful to Mr. M.S. Konnur, Director, Fluid Control Research Institute, Palakkad and the Governing Council of the above Institute for giving permission to do part time research and providing all the required facilities to carry out this research work.

The author is deeply indebted to his supervisor Dr. A. Kandaswamy, Professor and Dean of Electrical Sciences, P.S.G. College of Technology, Coimbatore for initiating and inspiring the author to do his research work. His able guidance, timely advice and continued encouragement through the progress of the work and also during the preparation of the report have enabled him to finish this thesis without any slightest moment of uncertainty.

The author is obliged to thank Dr. A. Shanmugam, Professor and Head, Department of Electronics and Communication Engineering for his encouragement. The author thanks all the faculty members and the supporting staff of ECE Department for their cooperation and help in carrying out this research work.

The author is grateful to the following for their contributions whenever needed. Mrs. K.V. Sajna, Mr. R. Rajesh, Mrs. S.K. Sreekala, Dr. Nagaraj Sitaram, Mr. R. Mascomani, Mr. U. Muthukumar, Mr. Sundaresan and Mr. C.K. Haridas of Fluid Control Research Institute, Palakkad.

M. VISWANATHAN
