## Contents

1. **Introduction** 1-9
   1.1 Cancer
      1.1.1 Types of cancer
      1.1.2 Multidrug Resistance in Cancer
      1.1.3 The Mechanism on cancer Therapy
      1.1.4 Cancer globally
      1.1.5 India- Cancer statistics
   1.2 Herbal Medicine
      1.2.1 Global Status of Herbal Medicine
      1.2.2 Indian Herbal trade in world Scenario
      1.2.3 Research Approach to Herbal Products

2. **Role of plants in cancer Drug Discovery- A Review** 10-14
   2.1.1 Plants as a source of anticancer agents
   2.1.2 Plant derived anti-cancer agents in clinical development
   2.1.3 Targeting natural products
   2.1.4 Rationale for studying anticancer botanicals

2.2. **Targeting the mitotic spindle- A Review** 15-23
   2.2.1 Limitation of microtubule based antimitotic agents
   2.2.2 Microtubule-based motor proteins
   2.2.3 Kinesins in mitosis
   2.2.4 Natural products as Kinesin inhibitors

3. **Scope, objective and Plan of work** 24-28

4. **Plant Profile** 29-31

5. **General materials and Cell culture profile** 32-37

6. **Extraction, Fractionation and Isolation** 38-41
   6.1 Collection and Authentication
   6.2 Extraction and Bio guided Fractionation
   6.3 Separation of successive chloroform extract by column chromatography
   6.4 Re-chromatography of Fractions

7. **Experimental- Biological Activity** 42-54
   7.1 **In Vitro cytotoxicity studies**
      7.1.1 Determination of Mitochondrial synthesis by MTT Assay
7.1.2 Determination of Mitochondrial synthesis by SRB Assay

7.2 Antioxidant studies
    7.2.1 DPPH Method
    7.2.2 ABTS Method
    7.2.3 DNA nicking Assay

7.3 Clonogenic Assay

8. Advanced Studies
    8.1 Nuclear staining Method
    8.2 DNA Fragmentation Assay
    8.3 ATP hydrolysis assay by Malachite green Assay
    8.4 Immunofluorescence Assay
    8.5 Gene Expression Analysis
    8.6 Cell cycle analysis by Flowcytometry

9. In vivo studies
    9.1 Short term toxicity studies- DLA cells
    9.2 Acute toxicity studies
    9.3 Ascites tumor model

10. Results and Discussion
    10.1 Structural elucidation of isolated compounds
    10.2 In Vitro cytotoxicity studies
    10.3 Anti-oxidant studies
    10.4 Clonogenic Assay
    10.5 Nuclear staining method
    10.6 DNA Fragmentation
    10.7 Malachite Green
    10.8 Immunofluorescence assay
    10.9 Gene Expression
    10.10 Cell cycle analysis
    10.11 In Vivo studies

11. Summary and conclusion

12. Reference

13. Appendix 1: List of Publication and presentations

14. Appendix 2: Awards and certificates
