TABLE OF CONTENTS

1. INTRODUCTION

1.1 GENERAL
1.2 REVIEW OF LITERATURE
1.3 PREVIOUS WORK IN GADILAM RIVER BASIN
1.4 ORDER OF PRESENTATION
1.5 AIM AND OBJECTIVES
1.6 METHODOLOGY

2. GEOGRAPHICAL AND GEOLOGICAL SETTINGS

2.1 INTRODUCTION
2.2 LOCATION
2.3 TRANSPORT AND COMMUNICATION
2.4 PHYSIOGRAPHY
2.5 CLIMATE
2.6 DRAINAGE
2.7 GEOLOGY AND STRUCTURE
2.8 SOILS
2.9 VEGETATION

3. HYDROGEOLOGY

3.1 INTRODUCTION
3.2 BEHAVIOUR OF GROUNDWATER
   3.2.1 Water Table
   3.2.2 Water Table Fluctuation
   3.2.3 Well Hydrographs
   3.2.4 Grid Deviation Water Table
3.3 AQUIFER TYPES
3.4 TYPES OF GROUNDWATER FLOW
3.5 PUMPING TEST
3.6 AQUIFER PARAMETER EVALUATION (METHODOLOGY)
   3.6.1 Theis Recovery Method
   3.6.2 Specific Capacity
   3.6.3 Time for Full Recovery Analysis
   3.6.4 Optimum Yield
3.7 AQUIFER CHARACTERISTICS
   3.7.1 Transmissivity
   3.7.2 Permeability

4. GEOPHYSICAL STUDIES

4.1 INTRODUCTION
4.2 ELECTRICAL RESISTIVITY METHODS
4.3 RESISTIVITY OF GEOLOGICAL FORMATIONS
   4.3.1 Limits and Utility of Resistivity Methods
4.4 METHODOLOGY
5. HYDROGEOCHEMISTRY

5.1 INTRODUCTION

5.2 MATERIALS AND METHODS

5.2.1 Expression of Analysis

5.2.2 Precision and Accuracy of Analysis

5.3 METHODS OF INTERPRETATION

5.3.1 Hill-Piper Diagram

5.3.2 Evaluation of Groundwater Quality for Irrigation

5.3.3 U.S. Salinity Diagram

5.3.4 Residual Sodium Carbonate (RSC)

5.3.5 Handa's Classification

5.4 TOTAL DISSOLVED SOLIDS (TDS) IN GROUNDWATER

5.5 METASOMATISM OF GROUNDWATERS

5.5.1 Chloro Alkaline Indices

5.5.2 Water Types

5.5.3 Calcium Carbonate Saturation Indices

5.6 MECHANISMS CONTROLLING THE CHEMISTRY OF GROUNDWATER

5.6.1 Corrosivity Ratio (CR)

5.7 HYDROGEOCHEMICAL MODEL

5.7.1 Deterministic Modelling

5.7.2 Principal Components

5.7.3 Principal Chemical Component

5.8 TRACE ELEMENT CONCENTRATION

5.8.1 Lead

5.8.2 Selenium

5.8.3 Cadmium

5.8.4 Molybdenum

5.8.5 Mercury

5.8.6 Arsenic

5.8.7 Antimony

5.8.8 Synthesis of trace element analysis

5.9 CONCLUSION
6. REMOTE SENSING AND GIS MODELING

6.1 INTRODUCTION
6.1.1 Geographic Information System (GIS)
6.1.2 Role of Geographical Information System (GIS)
6.1.3 Application of GIS

6.2 GIS APPLICATIONS - AN OVERVIEW
6.2.1 Application of GIS for Hydrologic Analysis

6.3 DEVELOPMENT OF GIS DATA BASE

6.4 DATA STACKING

6.5 DESCRIPTION OF THEMATIC MAPS
6.5.1 Geology
6.5.2 Geomorphology
6.5.3 Lineaments
6.5.4 Lineaments Density
6.5.5 Drainage Density
6.5.6 Iso-Apparent Resistivity
6.5.7 Integration of Thematic Maps

6.6 MODELING
6.6.1 Model Validation and Result

6.7 CONCLUSION

7. INTEGRATED ANALYSIS FOR GROUND WATER DEVELOPMENT

7.0 INTRODUCTION
7.1 DISCUSSIONS
7.2 CONCLUSION

8. SUMMARY AND CONCLUSIONS
