CONTENTS

Abstract i

CHAPTER 1: INTRODUCTION 1

1.1 The Web Application 1
1.2 The development of Internet 2
  1.2.1 The Local Area Network 3
  1.2.2 The Metropolitan Area Networks 4
  1.2.3 The Wide Area Networks 4
  1.2.4 The Wireless Networks 4
  1.2.5 The WWW 5
1.3 The Domain Name System 5
1.4 The Technology Overview 6

CHAPTER 2: PRESENT WORK 15

2.1 The Objective 15
2.2 The Architecture 16
  2.2.1 The architecture of PReWebD 16
  2.2.2 The architecture for PReWebN 18

CHAPTER 3: TOOLS USED 20

3.1 The Framework 20
3.2 The Microsoft Visual Studio 2005 21
  3.2.1 The Architecture of Visual Studio 2005 21
  3.2.2 The Features 22
3.3 The Microsoft .NET Framework 22
  3.3.1 The Features of .NET 23
3.3.1.1 The Assembly 23
3.3.1.2 The Common Type System 23
3.3.1.3 The Cross Language Interoperability 25
3.3.2 The CLR 25
3.3.3 The Architecture of CLI 26
3.3.4 The .NET FCL 28
3.3.5 The ADO.NET 28
  3.3.5.1 The Dataset 30
  3.3.5.2 The Data Provider 30
    3.3.5.2.1 The Connection Object 30
    3.3.5.2.2 The Command Object 31
    3.3.5.2.3 The Data Adapter 31
    3.3.5.2.4 The Data Reader 31
3.3.6 The life cycle of ASP.NET page 31
  3.3.6.1 The Page Request 32
  3.3.6.2 The Start 32
  3.3.6.3 The Initialization 32
  3.3.6.4 The Load 32
  3.3.6.5 The Validation 32
  3.3.6.6 The PostBack event handling 32
  3.3.6.7 The Rendering 33
  3.3.6.8 The Unload 33
3.3.7 The Web Server 33
3.3.8 The Microsoft SQL Server 2005 33
3.3.9 The IIS 34
  3.3.9.1 The HTTP Modules 34
  3.3.9.2 The Security Modules 35
  3.3.9.3 The Content Modules 35
  3.3.9.4 The Compression Modules 35
  3.3.9.5 The Caching Modules 35
  3.3.9.6 The Logging and Diagnostics Modules 35
3.4 The NetBeans IDE 35
3.4.1 The History of Evolving
3.4.2 The Version Used
3.4.3 The NetBeans Platform
3.4.4 The modules of NetBeans IDE
3.4.4.1 The NetBeans Profiler
3.4.4.2 The GUI Design Tools
3.4.4.3 NetBeans JavaScript Editor
3.4.5 The NetBeans IDE download bundles
3.4.5.1 The NetBeans IDE Bundle for Web & Java EE
3.4.5.2 The NetBeans IDE Bundle for Ruby
3.4.5.3 The NetBeans IDE Bundle for Java Micro Edition
3.4.5.4 The NetBeans IDE Bundle for C/C++
3.4.5.5 The NetBeans IDE Bundle for PHP
3.4.5.6 The NetBeans IDE Bundle for JavaFX
3.4.6 The Utilities of the IDE
3.4.7 The Features of NetBeans IDE 6.5.1
3.4.8 The JSF Overview
3.4.8.1 The different layers of JSF Architecture
3.4.8.2 The JSF page lifecycle
3.4.8.2.1 The Reconstruct Component Tree
3.4.8.2.2 The Apply Request Values
3.4.8.2.3 The Perform validations
3.4.8.2.4 The Synchronize Model
3.4.8.2.5 The Invoke Application Logic
3.4.8.2.6 The Render Response Phase
3.4.9 The Server
3.4.9.1 The Components of Apache Tomcat
3.5 The MySQL Database Server
3.6 The Testing Tools
3.6.1 The Mercury LoadRunner
CHAPTER 4: DESIGN ASPECTS AND IMPLEMENTATION

4.1 The Design Aspect
   4.1.1 The Presentation of PReWebD and PReWebN
   4.1.2 The Framework
   4.1.3 The View Technology
   4.1.4 The BL0
   4.1.5 The Database Design

4.2 Technical Specification
   4.2.1 Hardware Configuration
   4.2.2 Software Configuration

4.3 Implementation

CHAPTER 5: TESTING

5.1 The Performance Testing
5.2 The Performance Testing Approach for PReWebD and PReWebN
5.3 The Testing Parameters
5.4 The Testing Responses
5.5 The Performance Testing and Evaluation of PReWebD
   5.5.1 The Insert Operation
      5.5.1.1 The Stress level vs. Number of Hits
      5.5.1.2 The Stress level vs. Throughput
      5.5.1.3 The Stress level vs. Response time
   5.5.2 The Delete Operation
      5.5.2.1 The Response Time
      5.5.2.2 The Throughput
      5.5.2.3 The Hits/sec

5.6 Statistical Testing for PReWebD
   5.6.1 The Normality Test for PReWebD
   5.6.2 The Confidence Interval of Response Time, Hits/sec and Throughput
   5.6.3 The Factors Influencing the Response Time
5.7 The Performance Testing and Evaluation of PReWebN

5.7.1 The Insert operation

5.7.1.1 The Stress level vs. Hits/sec

5.7.1.2 The Stress level vs. Throughput

5.7.1.3 The Stress level vs. Response time

5.7.2 The Delete Operation

5.7.2.1 The Response Time

5.7.2.2 The Throughput

5.7.2.3 The Hits/sec

5.8 Statistical testing for PReWebN

5.8.1 The Normality Test for PReWebN

5.8.2 The Confidence Interval of Response time, Hits/sec and Throughput

5.8.3 The Factors Influencing the Response Time

CHAPTER 6: RESULTS AND DISCUSSION

6.1 On Experimental Results

6.1.1 On Experimental Results of PReWebD

6.1.2 On Experimental Results of PReWebN

6.2 On Results of Statistical Analysis

6.3 Discussion

CHAPTER 7: CONCLUSION
