# TABLE OF CONTENTS

ABSTRACT

ACKNOWLEDGEMENT

LIST OF FIGURES

LIST OF TABLES

ABBREVIATIONS

Chapter 1 INTRODUCTION ................................................................. 1
  1.1 Video Streaming ........................................................................ 2
  1.2 Mobility in Wireless Mobile Networks ..................................... 4
    1.2.1 Location Management ..................................................... 5
    1.2.2 Handover in Mobile Networks ......................................... 5
    1.2.3 Types of Handover ......................................................... 8
    1.2.4 Characteristics of an Efficient Handover Protocol .............. 9
  1.3 Buffer and Buffer Management ............................................... 10
  1.4 Thesis structure ...................................................................... 12

Chapter 2 LITERATURE REVIEW .......................................................... 14
  2.1 Reduction in Delay During Mobility ...................................... 16
  2.2 Reduction in Packet losses During Mobility .......................... 26
  2.3 Findings and Analysis from Literature Review ....................... 35

Chapter 3 PROBLEM STATEMENT ......................................................... 37
  3.1 PROBLEM STATEMENT (PS) ................................................... 37

Chapter 4 SYSTEM SCENARIO & SIMULATION TOPOLOGY .................. 40
  4.1 System Framework ............................................................... 40
  4.2 System Scenario and Topology .............................................. 41
  4.3 A Modeled Multimedia Streaming (Functional Entities) ............ 42
  4.4 Network Simulator (NS-2) .................................................... 43
  4.5 Simulation Topology ........................................................... 44

Chapter 5 HANDOVER & BUFFER MANAGEMENT .............................. 47
  5.1 Basic Terminologies and Signaling Description Required for Handover Signaling ........................................... 48
  5.2 Existing Handover Protocols .................................................. 49
    5.2.1 Mobile IPv6 (MIPv6) ...................................................... 51
    5.2.2 Fast MIPv6 (FMIPv6) .................................................... 52
Chapter 6 IMPROVED FAST MIPv6 HANDOVER PROTOCOL

Methodology, Results & Discussion

6.1 Proposed Model (Proposal 1 & 2): Improved Fast MIPv6 (I-FMIPv6)

6.2 Proposal No.1.1: Improving prospective address (PA) formation capability from the MN to PAR
   6.2.1 Router Solicitation for Proxy Advertisement with F-BU embedded inside RtSolPr [P, F-BU]
   6.2.2 Proxy Router Advertisement with P bit (PrRtAdv[P])

6.3 Proposal No. 1.2: Improving Signal & Messages by Embedding Layer 3 signals in Layer2 Signals

6.4 Proposal No. 2.1: To Reduce Packet Losses by Introducing a Dynamic Size Threshold Buffering System
   6.4.1 Buffering Mechanism
   6.4.2 Algorithm for Dynamic Threshold Buffer Management
   6.4.3 Message formats for Proposed Improved Fast MIPv6 (I-FMIPv6)
      6.4.3.1 Handover Initiate with Initial Buffer Size: HI [IBS]
      6.4.3.2 Handover Acknowledge (Hack [IBS])

6.5 Description of Signaling Sequence of I-FMIPv6 with Dynamic Size Threshold Buffer

6.6 Latency of handover (Delay) and Signaling Delay Cost (Analytical Analysis)
   6.6.1 Handover Latency and Signaling Delay Cost : Mobile IPv6 (MIPv6)
   6.6.2 Handover Latency and Signaling Delay Cost : Fast MIPv6 (FMIPv6)
   6.6.3 Handover Latency and Signaling Delay Cost : Improved Fast MIPv6 (I-FMIPv6)
   6.6.4 Handover Latency and Signaling Delay Cost : Hierarchical MIPv6 (HMIPv6)
   6.6.5 Empirical Example for Comparison of Handover protocols
   6.6.6 Protocol Breakpoints

6.7 Experimental Analysis
6.7.1 Results for Proposal 1.1, 1.2 & 2.1 -------------------------------------------- 89
6.7.2 Influence of Velocity of MN ----------------------------------------------- 92
6.8 Conclusion --------------------------------------------------------------- 94

Chapter 7 ADDITIONAL ENHANCEMENTS: Methodology, Results & Discussion
7.1 Proposal 3 - To improve QoS & QoE by -------------------------------------- 95
   7.1.1 Proposal No. 3.1: To Improve QoS & QoE by Synchronizing Unordered and Delayed Packets against its Playout Time
      7.1.1.1 Jitter Buffer & Playout Buffer Management ---------------------- 96
      7.1.1.2 Algorithm for Playout Buffer Management ---------------------- 97
      7.1.1.3 Improved Jitter & Playout Buffer management (An empirical example)
      7.1.1.4 Simulation Results ------------------------------------------- 98
   7.1.2 Proposal No. 3.2: To Select a Best PoA by taking an appropriate Handover Decision for Continuous Video Delivery
      7.1.2.1 Proactive handover (Traditional) ------------------------------- 99
         7.1.2.1.1 Received Signal Strength ------------------------------- 100
         7.1.2.1.2 Received Signal Strength with Threshold ---------------- 100
         7.1.2.1.3 Received Signal Strength with Hysteresis -------------- 100
         7.1.2.1.4 Received Signal Strength with Hysteresis and Threshold
      7.1.2.2 Improved Proactive Handover Decision Parameters ---- 104
         7.1.2.2.1 Received Signal Strength (RSS) ------------------------ 104
         7.1.2.2.2 Round Trip Time (RTT) ------------------------------- 105
         7.1.2.2.3 Packet Loss ------------------------------------------ 105
         7.1.2.2.4 Available Bandwidth ---------------------------------- 105
      7.1.2.3 Results and Discussion ------------------------------------------ 108
   7.2 Conclusion ------------------------------------------------------------- 109

Chapter 8 CONCLUSION AND FUTURE DIRECTIONS ---------------------------------- 110
