

LIST OF FIGURES

FIGURE NO.		PAGE
1.	Cells for culture and bioassay of <u>P. hygrophilus</u>	25
2.	Post-embryonic development of <u>P. hygrophilus</u> at $27 \pm 1^{\circ}\text{C}$	45
3.	Developing stages of <u>P. hygrophilus</u>	46
4.	<u>P. hygrophilus</u>	47
5.	Biochemical changes in <u>P. hygrophilus</u> due to starvation	59
6.	Enzymes in <u>P. hygrophilus</u>	60
7.	Build up of <u>P. hygrophilus</u> populations in different media	64
8.	Dosage mortality curves toxicity to <u>P. hygrophilus</u>	74
9.	Build up of <u>P. hygrophilus</u> in salts and amino acids	77
10.	Build up of <u>P. hygrophilus</u> in media with vitamins	95
11.	Growth of <u>P. hygrophilus</u> in fortified media	101
12.	Biomass of <u>P. hygrophilus</u> in microgrammes. Influence of chemicals in substrate	103
13.	Correlation between body length and gonad length in <u>P. hygrophilus</u>	105
