List of Tables

Chapter 2:
Table 2.1: Differences of values between western cultures and non-western cultures

Chapter 3:
Table 3.1: Mean rank scores of Delphi groups after each rounds
Table 3.2: Summary of the mean score of importance of each parameter in different rounds
Table 3.3: Summary of the mean weights of all groups in stage-3 rounds
Table 3.4: Average ‘parameter scores’ after five rounds in stage-4
Table 3.5: Final parameters and weight allocation (preliminary CFC model)
Table 3.6: Preliminary CFC scores of 22 countries
Table 3.7: Correlation matrix among Hofstede’s dimensions and preliminary CFC

Chapter 4
Table 4.1: Baseline characteristics of respondents
Table 4.2: Pilot CFC questionnaire obtained through perceptive process
Table 4.3: Pilot CFC model from Delphi sessions and Exploratory Factor Analysis (EFA)
Table 4.4: Mean scores at CFC Scale S1: ‘Seeing benefit in cross cultural engagements’
Table 4.5: Mean scores at CFC Scale S2 - ‘Willingness to socialize with foreigners’
Table 4.6: Mean scores at CFC Scale S3 – ‘Agreeing to equal status to world cultures’
Table 4.7: Mean scores at CFC Scale S4 – ‘Level of personal comfort’
Table 4.8: Mean scores at CFC Scale S5- ‘Willingness to explore foreign cultures’
Table 4.9: Mean scores at CFC Scale S6 – ‘Positive views about globalization’
Table 4.10: Mean scores at CFC Scale S7 – ‘Favorable impact of religion’
Table 4.11: Mean scores at Scale S8 – ‘Positive attitude of society towards foreigners’
Table 4.12: Mean scores at Scale S10 – ‘Willingness to use foreign goods and services’
Table 4.13: Mean scores at Scale S11 – ‘Ease of understanding of foreign culture’

Table 4.14: Mean scores at Scale ST2 (views of low income groups)

Table 4.15: Mean scores at Scale ST3 (Views of males)

Table 4.16: Mean scores at Scale ST4 (Views of Females)

Table 4.17: Mean scores at Scale ST5

Table 4.18: Ranking of countries based on scale rank scores

Table 4.19: Ranking of countries based on overall mean of scales

Table 4.20: Overall national ranks (based on rank totals and overall mean)

Chapter 5

Table 5.1: Final CFC model obtained from Structural Equation Modeling

Table 5.2: Sample size and baseline characteristics

Table 5.3: Inter correlation between control variables

Table 5.4: Correlations among CFC scales

Table 5.5: Differences among CFC scales in terms of country and control variables

Table 5.6: Observed mean differences (based on post hoc test (Tukey’s)

Table 5.7: Estimated marginal means: S1 / Country

Table 5.8: Estimated marginal means: S2 / Country

Table 5.9: Estimated marginal means: S3 / Country

Table 5.10: Estimated marginal means: S4 / Country

Table 5.11: Estimated marginal means: S5 / Country

Table 5.12: Estimated marginal means: S6 / Country

Table 5.13: Estimated marginal means: S7 / Country

Table 5.14: Estimated marginal means: S8 / Country

Table 5.15: Estimated marginal means: S10 / Country

Table 5.16: Estimated marginal means: S11 / Country

Table 5.17: Estimated marginal means: ST1 / Country

Table 5.18: Estimated marginal means: ST2 / Country
Table 5.19: Estimated marginal means: ST3 / Country
Table 5.20: Estimated marginal means: ST4 / Country
Table 5.21: Estimated marginal means: ST5 / Country

Chapter 6

Table 6.1: Participating respondents by city of residence and country
Table 6.2: Participating respondents by gender and city
Table 6.3: Participating respondents by income groups and city
Table 6.4: Participating respondents by age groups and city of residence
Table 6.5: Participating respondents by education level and city of residence
Table 6.6: CCD questionnaire obtained through perceptive process.
Table 6.7: Valid CCD scales as emerged from EFA and CFA
Table 6.8: Correlations among CCD scales – India
Table 6.9: Correlations among CCD scales – Italy
Table 6.10: Correlations among CCD scales – Portugal
Table 6.11: Reliability of scales related to different category of stereotype
Table 6.12: Inter correlation between CCD scales and different categories of stereotypes - India
Table 6.13: Inter Correlation between CCD scales and different categories of stereotypes – Italy
Table 6.14: Inter Correlation between CCD Scales and different categories of stereotypes - Portugal
Table 6.15: Differences among CCD scales in terms of city of residence and other control variables (for India)
Table 6.16: Differences among CCD scales in terms of city of residence and other control variables (for Portugal)
Table 6.17: Differences among CCD scales in terms of city of residence and other control variables (for Italy)

Chapter 7

Table 7.1: Comparison of CFC scores with Hofstede’s Scores
Table 7.2: Comparison of ranks of countries from primary and secondary data (pilot study)
Table 7.3: Ranks of countries from three country primary data (see fig 5.1)

Table 7.4: CFC scores based on 3 country comprehensive study

Appendices

Table 2.1a: Factor analysis of general questions of CFC questionnaire (Pilot Study)
Table 2.2a: Reliability of data
Table 2.3a: Other statistics for internal consistency of the CFC questionnaire
Table 2.4a: Summary of statistical analysis for overall sample (N=361)
Table 3.1a: Result of EFA - India
Table 3.2a: Result of EFA - Italy
Table 3.3a: Result of EFA - Portugal
