ACKNOWLEDGEMENT

First and foremost, I would like to express my immense gratitude towards University School of Information Communication Technology, GGSIP University which helped me to attain profound technical skills in the field of information technology, thereby fulfilling my most cherished goal.

I would like to sincerely thank to my research supervisor Prof Nupur Prakash, Professor, University School of ICT for her precious guidance and kind cooperation at every step of this research. Her valuable guidance and inspiring words are the source of motivation for my work. She has been very understanding and friendly. Without her guidance and encouragement this dissertation would not have been possible.

I thank Prof. Navin Rajpal, Dean USIT, Prof B.V.R Reddy, Dr Arvinder Kaur, Dr. Pravin Chandra, Dr. C.S.Rai and Dr Anjana Gosain for giving an opportunity to work towards doctoral degree in the esteemed university. My special thanks goes to Dr. Amar Kumar Mohapatra for his non-ending support and guidance and also to Dr. Vandna Jowaheer from the University of Mauritius for guiding me to do the statistical analysis of incidents.

I can not forget the heartiest regard, the never ending heartfelt stream of caring and love that my family members and my friends bestowed on me. It is the power of their coordination that gave me strength, courage and confidence to materialize my dreams. I would also like to express my deepest gratitude to my dear wife Mahtaab Usmani, who made many compromises to let me finish my Ph.D. Without your support and understanding this thesis would not have been completed.

Finally, I would like to thank my mother, who being 85 years of age has tirelessly kept on boosting my morale to realise her dream of me completing this Ph.D. study. Thank you all!

Kaleem A. Usmani
