C O N T E N T S.

SYNOPSIS. 1 – 5

CHAPTER – I.

A FEW CONSTITUTIVE EQUATIONS USED IN NON-NEWTONIAN FLUID DYNAMICS. 6 – 27

1.1. Introduction 6

1.2. Classical approaches 6

1.3. Inadequacy of Classical theories 8

1.4. Generalization of classical approaches 9

1.5. Rivlin-Ericksen theory for a general fluid 17

1.6. Maxwell liquid and Oldroyd's generalization 20

1.7. Motivation, extent and scope of the thesis 25

CHAPTER – II.

FLUCTUATING FLOW AND HEAT TRANSFER OF A NON-NEWTONIAN FLUID PAST A POROUS FLAT PLATE WITH TIME-VARYING SUCTION. 28 – 72

2.1. Introduction 28

2.2. Mathematical analysis 30

2.3. Temperature field 52

2.4. Conclusions 62

CHAPTER – III.

THE FLOW OF A SECOND ORDER FLUID BETWEEN TWO COAXIAL CIRCULAR CYLINDERS DUE TO TORSIONAL OSCILLATION OF THE INNER CYLINDER. 73 – 105

3.1 Introduction 73

(Problem.(i).

3.2. Formulation of the problem 74

3.3. Solution of Equations 80

3.4. Conclusions. 92

Problem. (ii)

3.5. Formulation of the problem 98

CHAPTER – IV.

LAMINAR FLOW OF A SECOND ORDER FLUID BETWEEN ROTATING POROUS DISKS. 106–146

4.1. Introduction 106

4.2. Formulation of the Problem 109

4.3. Solution of equations 120

4.4. Discussion of Results 135

CHAPTER – V.

FLOW OF ELASTICO–VISCOUS LIQUID NEAR A STAGNATION POINT WITH AND WITHOUT SUCTION. 147–168

5.1. Introduction 147

5.2. Extremal point Collocation Method 148

5.3. Basic Equations 152.

5.4. Approximate Solution 157

5.5. Conclusions 166

CHAPTER – VI.

COMBINED FREE AND FORCED CONVECTION EFFECTS ON THE NON-NEWTONIAN FLOW THROUGH A CHANNEL. 169-202

6.1. Introduction 169

6.2. Formulation of the problem 171

6.3. Solution of equations 176

6.4. Conclusions 192

CHAPTER – VII.

FREE CONVECTION FLOW OF NON-NEWTONIAN FLUIDS BETWEEN PARALLEL WALLS. 203-218

7.1. Introduction 203

7.2. Formulation of the Problem 204

7.3. Solutions of equations 208

7.4. Conclusions 213

CHAPTER – VIII.

FREE CONVECTION NON-NEWTONIAN FLOW WITH AND WITHOUT HEAT SOURCES IN A CIRCULAR PIPE. 219-240

8.1. Introduction 219

8.2. Formulation of the Problem 221

8.3. Solution of equations 229

8.4. Conclusions 235

CHAPTER – IX.

IDEALIZED PLANE-SLIDER BEARING WITH A NON-NEWTONIAN LUBRICANT. 241-252

9.1. Introduction 241

9.2. Mathematical analysis 242

9.3. Conclusions 251

BIBLIOGRAPHY. 253-266
