ACKNOWLEDGEMENT

First of all, I bow my head in reverence and thanks giving before the merciful ALMIGHTY, the BENEVOLENT and the SUPREMEGIVER. After remembering HIM, as I always do before starting any new venture, I wish to pay my heartfelt respects to my father, Late Dr. T.N. Bhagoliwal and my mother Smt. Premlata Bhagoliwal.

The teacher shows the path and also helps his student to tread on that path and can be considered only next to GOD. By the grace of GOD, I was fortunate to have Dr. V.K. Sehgal as my guide. His simple,"assuming and helping nature, belies his high stature and academic achievements. His keen supervision, timely guidance and constant encouragement, has been the sole reason enabling me to complete this project. I wish to express my thanks and gratitude to him from the core of my heart.

To express thanks and the feelings, I have for Dr. G.K. Shukla, are beyond words. But I would strive to the best of my ability to bring those feelings on paper. Dr. G.K. Shukla, an International figure in Statistics and Biometrics, is a committed teacher, devoted scientist and an academician par excellence. I was fortunate enough to have come into his contact, some 3 decades back when he had joined IIT, Kanpur as a faculty. He literally taught me to walk, introducing biostatistics and biometrics to me. He is so humble, but at the same time so unrelenting that his students have no alternative, but to follow the path of learning. Twenty five years back, he made me learn FORTRAN and during the course of this work, made me work on MATLAB. On both occasions, I started with hesitation and skepticism but ended up
thanking Dr. Shukla to have forced me to learn a thing without which, I feel a statistician is incomplete. His humane qualities, the desire to make his students perfect and at the same time not allowing himself to be irritated by the unaware student, makes him an ideal teacher. I attribute all my knowledge of statistics, though very meager, to Dr. G.K. Shukla. I shall ever remain grateful to him for this and also for the ungrudging hospitality he has rendered and the innumerable cups of black coffee that he has offered, giving a cool break, after long hours of work.

The role of my family has been tremendous in my pursuit of academic improvement. My wife Smt. Kumkum Bhagoliwal deserves special words of thanks for all the love, affection and frequent small fights which have been very useful to me. I also thank my children Deep, Parul and Puneet. Deep deserves special mention as he has always helped me by offering very useful suggestions, for the improvement of this work.

There is a long list of friends who have a very important role in enabling me to complete this work. First I wish to thank Dr. Kiran Pandey, as the problem considered in this work owes its origin to her. Mr. Vijai Kumar, Mr. D.K. Pathak and Mr. B.S. Dube have always been a pillar of strength to me. Their moral and logistic support from time to time has been crucial. I would be failing in my duty if I do not mention the name of Mr. Brijesh Singh who seems to have an answer to every problem. Last but not the least I wish to thank Mr. Surendra Sharma for his efficient typing skills which has given a presentable shape to this thesis.

(AJAY BHAGOLIWAL)
