

LIST OF TABLES

TABLE	SUBJECT	PAGE
1	Number of children registered for study in different months	50
2	Socio-demographic characters of study families	51
3	Background information of maternal factors-I	52
4	Background information of maternal factors-II	54
5	Maternal Age and Birth weight of children	56
6	Birth order and socio-economic status of children	57
7	Birth order and birth weight of children	58
8	Initiation of breast-feeding	59
9	Prelacteal feeding practices	59
10	Feeding practices at different age of children	60
11	Type of top feeding at the time of supplementation	61
12	Reasons of supplementation	62
13	Immunization status and Vit. A-prophylaxis	63
14	Morbidity pattern according to children suffered from 0-2 years of age	64
15	Distribution of different morbidity pattern in relation to sex	65
16	Source of treatment during illness	67
17	Mean weight (kg) of children from 0-2 years age	69
18	Percentage deficit of mean weight as compared to WHO standard	70
19	Mean height(cm) of children from 0-2 years of age	71
20	Percentage deficit of mean height as compared to WHO standard	72
21	Nutritional status of children from 0-2 years as per ICDS growth chart	73
22	Height-for-age of children based on Waterlaw's classification	74
23	Height-for-age of children in relation to sex	75

24	Weight-for-height of children under study	76
25	Weight-for-height in relation to sex	77
26	Milestones of development of study children	78
27	Caste and morbidity pattern according to number of children suffered	79
28	Caste and morbidity pattern according to number of episodes (spell)	80
29	Socio economic status and morbidity pattern according to number of children suffered	80
30	Socio economic status and morbidity pattern according to number of episode (spell) per year	81
31	Maternal occupation and morbidity pattern according to number of children suffered	82
32	Maternal occupation and morbidity pattern according to number of episode (spell)	83
33	Feeding practices and diarrhoeal diseases according to number of children suffered	83
34	Feeding practices and diarrhoeal diseases according to number of episode (spell)	84
35	Birth order and morbidity pattern according to number of children suffered	84
36	Birth order and morbidity pattern according to number of episode (spell)	85
37	Birth weight and morbidity pattern according to number of children suffered	86
38	Birth weight and morbidity pattern according to number of episode (spell)	87
39	Morbidity pattern and nutritional status of 2 years of age	88
40	Nutritional status and morbidity pattern according to number of episode (spell)	89
41	Milestones of development and morbidity pattern according to number of children suffered	90
42	Milestones of development and morbidity pattern according to number of episode (spell)	91

43	Nutritional status at 2 years of age in relation to caste	91
44	Nutritional status in relation to socio-economic status	92
45	Nutritional status in relation to type of family	93
46	Nutritional status and birth order	94
47	Nutritional status of two years of age and supplementary feeding	95
48	Nutritional status of children with respect to sex	96
49	Nutritional status (As per WHO standard) at age of one and two years.	97
